VOL. 12

1914

The

AGROMECK

PUBLISHED ANNUALLY
BY THE MEMBERS OF
THE SENIOR CLASS

NORTH CAROLINA COLLEGE
OF AGRICULTURE AND
MECHANIC ARTS
WEST RALEIGH, N.C.

THIS ANNUAL WAS DESIGNED, MONOTYPED, PRINTED
BOUND AND MADE COMPLETE IN THE ESTABLISH-
MENT OF THE EDWARDS AND BROUGHTON PRINTING
COMPANY, RALEIGH, NORTH CAROLINA

To
Thomas Perrin Harrison, Ph.D.
Dean and Professor of English
The Class of 1914 respectfully dedicates
this the twelfth volume of
The Agromeck

Dr. Thomas Perrin Harrison

Dr. Thomas P. Harrison, to whom the 1914 AGROMECK is appropriately dedicated, has been Professor of English in this College since the session of 1908-'09, and Dean since 1911. Being at the head of a department which deals with nearly every student in college, and being responsible as Dean for innumerable matters aside from his teaching, Dr. Harrison is one of the best known men on the hill. His reputation as a thorough teacher and as a just and kindly man is therefore based on daily acquaintance. His unofficial interest in the students has been manifested by the part he has constantly taken in the chapel services and other religious exercises at the College, and by his willingness to take endless trouble for those who need help or counsel. He was at one time teacher of the A & M Class at the Presbyterian Sunday-school.

Dr. Harrison is a man of broad culture and of large experience as a teacher. He received his undergraduate training at the Citadel in Charleston; he was later a student in the graduate school of Johns Hopkins University, where he earned the doctor's degree. Before beginning his work here five years ago, Dr. Harrison had taught English at Clemson College, and for thirteen years at Davidson College in this State. He has more recently become associated with the University of North Carolina through lectures and classes each year at the University Summer School.

Dr. Harrison's work is characterized by wide acquaintance with his special subjects, together with their backgrounds of history and human interest, and by a love of high standards in work and conduct. Though eminently tolerant, he has little patience with persistent idleness and none at all with anything low or deceitful. It is worth while to add that he keeps close watch over the affairs of his department, and that his opinion always carries weight in the larger affairs of the College.

GEORGE SUMMEY, JR.

Foreword

It is our purpose to present in this volume a picture, as realistic as possible, of the life at A & M as seen and lived by our class. By this we mean not the life of the class room only, but our little college world in all its phases, social, athletic, literary, religious, and otherwise. We aim to present ourselves, not as the little angels our mothers sometimes think us, nor as the indolent drones and sapheads the Faculty think we are; but as we feel ourselves to be—with our youthful joys and sorrows, our faults and follies, and our young ideals and ambitions.

"Life," says Ingersoll, "is a narrow vale between the cold and barren peaks of two eternities." We are now just at the foot of the further peak. We are leaving the gay and joyous garden of youth behind us, and about to begin the hard and laborious climb up the steep and rugged ascent of manhood. As we draw nearer the top of that steep ascent, may this volume bring back to us many happy memories of the four short years of our college life.

To our friends and readers, we offer no apologies, only greetings. We, in behalf of the class, have done our best; and if there be fault it lies not in our efforts but in ourselves.

Faculty

Faculty

DANIEL HARVEY HILL, A.M., LL.D.

President

A.B., Davidson College, '80-'86; LL.D., '05; LL.D., University of North Carolina, '10; Professor of English, Georgia Military and Agricultural College, '80-'89; Professor of English, N. C. A & M, '89-'08; Vice-President, '05-'08; President, '08—

WALLACE CARL RIDDICK, A.B., C.E.

Vice-President and Professor of Civil Engineering

A.B., University of North Carolina, '85; C. E., Lehigh, '90; Engineer, Roanoke (Virginia) Water and Power Company, '90-'92; Professor of Mathematics and Civil Engineering, N. C. A & M College, '92-'95; Professor of Civil Engineering, '05; Vice-President, '08—

WILLIAM ALPHONSO WITHERS, A.M.

Professor of Chemistry

A.B., Davidson College, '83; Postgraduate Student, Cornell, '88-'90; Fellow, '89-'90; Elected to Sigma Xi; Assistant Chemist, N. C. Experiment Station, '81-'88; Chemist, '97; Acting Director, '97-'98; State Chemist, North Carolina, '97-'98; Professor of Chemistry, N. C. A & M, '89—; Member Executive Committee, Pure Food and Drug Congress, '98; Vice-President, American Chemical Society, '01-'02; Fellow, American Association for the Advancement of Science; President, American Association of Official Agricultural Chemists, '09-'10; Author N. C. Pure Food Law, '99.

ROBERT E. LEE YATES, A.M.

Professor of Mathematics

A.M., Wake Forest College, '88; Adjunct-Professor of Mathematics, N. C. A & M, '91-'05; Student in Higher Mathematics, Chicago University, '05-'06; Professor of Pure Mathematics, N. C. A & M, '06—

THOMAS NELSON

Professor of Textile Industry

Diploma, Cotton Manufacturing, Harris Institute, Textile School of Preston, Lancashire, England, '10; Special Designing and Cloth Analysis Course, Lowell Textile School, '98; Certificate, Weaving and Designing, City and Guilds of London Institute; Private Pupil in Designing and Mill Management of Mr. John Fish; Manager of Queens Mill, Preston, England; Experience in English, Northern, and Southern Mills; Member of American Textile Association and Author of Technical Books and Textile Journal Correspondent; Instructor in Warp Preparation and Power Loom Weaving, Lowell Textile School, Lowell, Mass., '00; Instructor in Weaving and Designing, N. C. A & M, '01-'06; Professor of Textile Industry, '06—

CLIFFORD LEWIS NEWMAN, M.S.

Professor of Agriculture

B.S., A & M of Alabama, '86; M.S., '87; Assistant Professor of Agriculture, University of Tennessee, '87-'89; Principal of Athens (Alabama) Agricultural School, '89-'91; Assistant Agriculturist, Arkansas Experiment Station, '91-'97; Professor of Agriculture, University of Arkansas, '97-'05; Professor of Agronomy, Clemson College, S. C., '05-'08; Professor of Agriculture, N. C. A & M, '08—

WILLIAM HANDE BROWNE, JR., A.B.

Professor of Physics and Electrical Engineering

A.B., Johns Hopkins, '90; Practical Engineer, '90-'96; Instructor of Electrical Engineering, University of Nebraska, '96-'98; Assistant Professor of Electrical Engineering, University of Illinois, '98-'02; Technical Editor, *Electrical Review*, '02-'08; Professor of Physics and Electrical Engineering, N. C. A & M, '08—

HOWARD ERNEST SATTERFIELD, M.E.

Professor of Mechanical Engineering

B.S. in M.E., Purdue University, '04; M.E., '09; Professor of Mechanical Engineering, N. C. A & M, '08—

THOMAS PERRIN HARRISON, Ph.D.

Dean and Professor of English

B.S., South Carolina Military Academy, '86; Instructor South Carolina Military Academy, '86-'88; Ph.D., Johns Hopkins University, '91; Associate Professor of English, Clemson College, S. C., '91-'96; Professor of English, Davidson College, N. C., '96-'08; Professor of English, N. C. A & M, '08—

GUY ALEXANDER ROBERTS, B.S., D.V.S.

Professor of Veterinary Science and Physiology

B.Agr., University of Missouri, '99; D.V.S., Kansas City Veterinary College, '03; Assistant North Carolina Veterinarian, '03-'07; Instructor of Veterinary Science and Physiology, N. C. A & M, '03-'05; Assistant Professor, '05-'06; Associate Professor, '06-'08; Professor, '08—

THOMAS EVERETT BROWNE, A.B.

Professor of Agricultural Extension

A.B., Wake Forest College, '02; Instructor of Latin and Higher English, Atlantic College Institute, Elizabeth City, N. C., '02-'04; Superintendent of Public Instruction, Hertford County, N. C., '05-'11; County Agent in Farmers Cooperative Demonstration Work, Hertford County, '08-'11; District Agent in F. C. D. Work for Eastern North Carolina, '11-'13; Assistant State Agent in F. C. D. Work and Superintendent of Extension in Charge of Boys' Corn Clubs, '13—; Professor of Agricultural Extension, N. C. A & M, '13—

HORACE FLETCHER SPURGIN, FIRST LIEUTENANT, U. S. A.

Professor of Military Science and Tactics

West Point, Class of '06; Fort Washington, Md., in Defense of Washington, D. C., '07-'10; Fort Monroe, Va., Student Officer Artillery School, '10-'11; Fort Crockett, Texas, in

defense of Galveston, Texas, '11-'13; Professor of Military Science and Tactics, N. C. A & M College, '13—

JOHN CHESTER MCNUTT, B.A., Agr.

Professor of Animal Husbandry and Dairying

B.S. Agr., Ohio State University, '07; Supt., Hartman Stock Farm, Columbus, Ohio, '07-'08; Assistant in Animal Husbandry, New Hampshire State College, '08-'09; Assistant Professor, '09-'10; Associate Professor, '10; Professor of Animal Husbandry and Dairying, N. C. A & M, '10—

HARRY RASCOE FULTON, M.A.

Professor of Botany and Vegetable Pathology

A.B., University of Mississippi, '00; A.M., University of Missouri, '05; A.M., Harvard University, '06; Instructor in Biology, University of Mississippi, '03-'04; Plant Pathologist, Louisiana Experiment Stations, '06-'08; Assistant and Associate Professor of Botany, Pennsylvania State College, '08-'12; Professor of Botany and Vegetable Pathology, N. C. A & M, '12—; Fellow in the American Association for the Advancement of Science; Member of the American Physiopathological Society; of Sigma Xi Scientific Society; of Phi Kappa Phi Honor Society, of Delta Psi Fraternity.

JOSHUA PLUMMER PILLSBURY, B.S.

Professor of Horticulture

Certificate, Missouri Botanical Garden and Shaw School of Botany, Washington University, St. Louis, Mo., '95; Head Gardener, Pennsylvania State College, '95-'98; Assistant in Horticulture, Pennsylvania State College, '98-'00; B.S., Pennsylvania State College, '10; Designed and established the four year course in Landscape Gardening at Pennsylvania State College, '10; Assistant Professor of Horticulture (in charge of Landscape Gardening), Pennsylvania State College, '11-'10; Professor of Horticulture, N. C. A & M, '11—

MELVIN ERNEST SHERWIN, B.S.A., M.S.

Professor of Soils

B.S.A., University of Missouri, '08; M.S., University of California, '09; Student Assistant in Agronomy in charge of Detail Experimental Investigations, '06-'08; Assistant in Agronomy, University of California, '08-'09; Professor of Agronomy, University of Maine, '09-'10; Associate Professor of Soils, N. C. A & M, '10-'12; Professor of Soils, '12—

CARROLL LAMB MANN, B.S., C.E.

Professor of Railroad Engineering

B.S., N. C. A & M, '99; C. E., '05; Isthmian Canal Commission, Nicaragua, '99-'01; Civil Engineer, Seaboard Air Line Railway, '01-'02; Instructor in Civil Engineering, N. C. A & M, '02-'08; Assistant Professor, '08—; Professor of Railroad Engineering, '13—

Assistants and Instructors

ZENO PAYNE METCALF, B.A.

Associate Professor of Zoology and Entomology

B.A., Ohio State University; Assistant in Zoology and Entomology, Ohio State University, '06; Instructor in Biology, Bloomington (Illinois) High School, '07; Instructor in Entomology, Michigan Agricultural College, and Assistant Entomologist, Michigan Experiment Station, '08; Assistant Entomologist, North Carolina Department of Agriculture, '08-'12.

BARTHOLOMEW MOORE PARKER, B.S.

Assistant Professor of Textile Industry

B.S., N. C. A & M, '98; Student in Lowell Textile School, Mass., '98-'01; Assistant in Clemson College, S. C., '01-'03; Instructor in Textile School, N. C. A & M, '03-'05; Assistant '07-Professor of Textile Industry, '05—

GEORGE SUMMEY, JR., Ph.D.

Assistant Professor of English

A.B., Southwestern Presbyterian University, '97; Ph.D., '01; Student, University of Leipzig, '01-'02; Instructor in English, N. C. A & M, '03-'06; Assistant Professor, '09—

WILLIAM ROSWELL CAMP, A.B.

Professor of Economics

A.B., Leland Stanford, Jr., University, '09; Graduate Student, '09-'11; Graduate Student and Teaching Fellow, University of Missouri, '11-'12; Professor of Social Sciences, Lombard College, '12-'13; Professor of Economics, N. C. A & M, '13—

WELDON THOMPSON ELLIS, B.E., M.E.

Assistant Professor of Machine Design and Steam Laboratory

B.E., N. C. A & M, '06; M.E., '08; Assistant Professor of Machine Design and Steam Laboratory, N. C. A & M, '07—

LEON FRANK WILLIAMS, A.B., A.M., Ph.D.

Assistant Professor of Chemistry

A.B., Trinity, '01; A.M., '02; Ph.D., Johns Hopkins, '07; Assistant Professor of Chemistry, N. C. A & M, '07—

HENRY K. MCINTYRE, E.E.

Assistant Professor of Physics and Electrical Engineering

E.E., Columbia University, '99; with Sprague Electric Co., '99-'00; New York Telephone Co., '00-'07; Grey Electric Co., '07-'08; Special Work in Electrical Engineering, '07-'08; Assistant Professor of Physics and Electrical Engineering, N. C. A & M, '09—

LILLIAN LEE VAUGHAN, M.E.

Instructor in Mechanical Engineering

B.E., N. C. A & M, '06; M.E., '09; M.E., Columbia University, '11; Instructor in Mechanical Engineering, N. C. A & M, '12

CHARLES MCGEE HECK, A.B., M.A.

Assistant Professor of Physics

A.B., Wake Forest College, '00; M.A., Columbia University, '01; Student of Physics in Berlin, '02-'03; Professor of Physics, University of Nebraska, '04-'11; Professor of Physics, Colorado College, '12-'13; Assistant Professor of Physics, N. C. A & M, '13—

CHARLES BENJAMIN PARK

Instructor in Machine Shops and Assistant in Power Plant

Graduate, Raleigh Male Academy, '82; Machinist for Seaboard Air Line Railroad, '82-'89; Instructor in Machine Shops and Assistant in Power Plant, N. C. A & M, '90—

T. H. TAYLOR

Instructor in Poultry Husbandry

Graduate, R. I. College Poultry School, '00; Instructor in charge of Experiment Work, '00-'02; Barcliff Farms, N. Y., '02-'04; Monmouth Poultry Farms, Freneau, N. J., '04-'06; Poultry Department, Pinchurst Farms, N. C., '06-'11; Assistant in Poultry Husbandry, N. C. A & M, '11-'12; Instructor in Poultry Husbandry, N. C. A & M, '12—

ABRAHAM RUDY, A.M., Ph.D.

Instructor in Modern Languages

A.B., Polytechnic University, Riga, Germany, in Modern Languages, '85; A.M., University of New York, '02; Ph.D., '04; Public School Teacher with Certificate, in Iowa, Nebraska, New York, '85-'02; in Philippine Islands, '01-'07; Instructor in Modern Languages, N. C. A & M, '07—

JOHN EDWARD HALSTEAD, B.S.

Instructor in Dyeing

B.S., Leeds University, England, '95; Chemist, large carpet factory, Yorkshire, England, '96-'98; in charge of Chemistry and Dyeing Department, Leicester Technical College, England, '98-'99; Assistant Dyer in large dyeworks of Yorkshire, England, '00-'01; Assistant Manager of Cotton Pierce Dyeworks, Yorkshire, England, '01-'07; in charge of Dyeing Department, N. C. A & M, '08

HERBERT NATHANIEL STEED

Instructor in Weaving and Designing

Special Textile Student, N. C. A & M, '03-'05; Assistant Instructor in Carding and Spinning, '05-'06; Instructor in Weaving and Designing, '06—

FRED BARNETT WHEELER, B.E.

Instructor in Wood Shop and Pattern Making

B.E., N. C. A & M, '12; Instructor in Forge, '07-'12; Instructor in Wood Shop and Pattern Making, '12—

HERMAN BURKE BRIGGS, B.E.

Instructor in Shopwork and Drawing

B.E., N. C. A & M, '13; Instructor in Shopwork and Drawing, N. C. A & M, '13—

**IN LOVING MEMORY
OF
EDWARD WILLIAM WALDROUP
DIED IN OUR JUNIOR YEAR**

Edward William Waldroup

Edward William Waldroup was born in Hayesville, Clay County, North Carolina, July 20, 1889. After preliminary school training at Hiwassee, Ga., and Murphy, N. C., he entered the Cullowhee Normal and Industrial School, from which he graduated with the class of 1909.

Entering A & M College in the fall of 1910 with the present Senior Class, he registered for a course in Electrical Engineering. For three years he was a faithful and hard-working student, always thinking of his duty to others and to his college. But just as the future began to seem brightest, the hand of Fate lay heavily upon him. While spending his vacation in Raleigh he became ill and was taken to Rex Hospital, where he died July 27, 1913.

His death was a source of deep regret to all who knew him. He numbered his friends by the score, and was held in the highest esteem by all with whom he came in contact.

Seniors

SENIOR GIRL

Senior Class Poem

Into thy measureless treasury of years
Have we paid, O Father Time,
Four nine-month measures of our golden youth.
But, thou, making return in full, hast given
For each day a day within these college walls.
Well spent have been these priceless hours,
And we regretless can regard
What we, in full recompense, have received.

I

Surely, our comrades of this place
Were in themselves worthy the exchange.
For in the interchange of thoughts
Mirthful, fanciful, or grave,
Was priceless friendship to us given.
Many were the pleasures
In those fellowships enjoyed:
Long tramps through vivid Autumn's
Leaf strewn hollows,
The cool air with woodland odors spiced;
Dull winter evenings laughed away,
Or in the silence of friends happily forgot;
Joyous days of Spring, with gladness filled,
Or balmy evenings in whose soft moonlight
College mates' voices mingled in serenade.
Then were there manly sports throughout,
In which the lithe runner to be first
Strained every nerve, and willed tired feet to speed,
And courage trying games well planned
To test, in fierce rush and swaying mass,
The pluck and strength of the clear-eyed.

II

More than the friends of college days
And the pleasures which we shared

Did we receive for those four measures of our youth:
Father Time, in addition, gave books, teachers, friends;
That the truth of Life which in them lived
Might attract the truth which within us lay,
And cause it to express order and kindness in our lives.

On this last day within these walls,
The day on whose tomorrow we,
Awkward and afraid, must commence our larger Life,
Some sadness mingles with memory's joys,
But not long. For there cannot fail to come
The remembrance that Time to us has given
Some priceless, though unseen, gifts
From which enough knowledge we have drawn
To read some lines in the Book of Life
And their instruction live as best we could.
And within us has grown a desire
To bargain more, and willingly exchange
Our treasure of years, weeks, then hours
For many pages in that same book.

EDWARDS, A. V.	MILLER, M. E.	WALDROUP, E. W.
EVERETT, W. R.	MONGER, J. G.	WARD, J. H.
FEREBEE, J. E.	MOORE, O. C.	WEEKS, L. D.
GATTIS, E. H.	MOSS, V. F.	WHITLEY, D. C.
GORRILL, C. B.	MURCHISON, J. C.	WILSON, D. C.
GRANT, H. L.	MURRAY, E. N.	YATES, E. T.
GREEN, B. S.	NEAL, J. I.	YERBY, L. G.
GRIFFITH, J. W.	OVERTON, C. E.	YOW, A. C.

Senior Class

MOTTO:

"Deeds, not words"

COLORS: *Orange and blue*

FLOWER: *Rose*

Officers

D. W. THORP, *President*

T. W. NICHOLLS, *Vice-President*

W. B. LITTLE, *Secretary and Treasurer*

T. W. PORTER, *Historian*

T. L. BAYNE, *Poet*

G. H. ANTHONY, *Prophet*

"Friends of my youth, a last adieu!

Haply some day we meet again.

Yet ne'er the selfsame men shall meet--

The years shall make us other men."

GRAHAM HUDSON ANTHONY, "Aus"
Shelby, N. C.

Mechanical Engineering

"Could I love less, I should be happier now."

Age, 22 Height, 6'-1" Weight, 170

Sigma Nu Fraternity; Saints; German Club, Floor Manager (2); Leader (3); Manager Class Baseball (1); Class Poet (2); Varsity Football (2); (3); (4); Assistant Business Manager *Bona fide* (3); Business Manager (4); Secretary-Treasurer Athletic Association (4); Class Prophet (4); Senior Quartet; Mechanical Engineering Society.

Being the most popular man in college is not the only attribute of this winner of feminine hearts. Liberally endowed with good looks and an excellent line, he holds a prominent place in all college activities; and also is widely known beyond the campus. For some time Raleigh has had great attractive powers for "Aus."

BASCOM OTTO AUSTIN, "Dock"
Charlotte, N. C.

Electrical Engineering

"Use, do not abuse; neither abstinence nor excess renders man happy."

Age, 23 Height, 5'-11" Weight, 160

Y. M. C. A., Punctuality Roll (1); Honors in Scholarship (1); (2); Sub Varsity Basketball (2); Vice-President Pullen Literary Society (3); Assistant Manager Varsity Baseball (3); Captain Class Basketball (3); Class Football (3); Manager Varsity Baseball (4); President Electrical Engineering Society (4); President Hornets Club (4); Athletic Editor *Red and White* (4).

Behold a perfectly calm and sane young man. There's no foolishness about this Austin person. He knows what he wants and goes and gets it—without any flurries or fluster. He has but two obsessions, basketball and Pittsburg. Of late the latter interest has claimed the biggest part of his time.

CLARE RUSSELL BAILEY, "Rastus"
Chadbourn, N. C.

Agriculture

"As we advance in life we learn the limits of our abilities."

Age, 21 Height, 5'-9" Weight, 150

Y. M. C. A.; Pullen Literary Society; Bi-Ag Society;
Biological Club; Country Gentlemen; Company Q;
Honor Graduate.

Here is a lover of the weed and ye old cob pipe. His sole ambition is to be a farmer, and that he will. He is seldom seen without his "Agricola" smile. His chief dissipation is his kodak. He tells marvelous tales about the strawberries they raise in Chadbourn, wherever that is.

HUGH MARCELLUS BAILEY, "H. M."
Woodleaf, N. C.

Agriculture

"Knowledge advances by steps and not by leaps."

Age, 21 Height, 6' Weight, 165

Biological Club; Rowan County Club; Y. M. C. A.;
Class Football (3); Country Gentlemen; Biological
Club.

In his fourth year of misery he decided that he would rather be a quack than a hay-seed farmer, so he took up veterinary work. He has a great antipathy for the wheat plant, owing to some experiences he had last summer in the west. He is especially admired by his wards in the dormitories.

THOMAS LEVINGSTON BAYNE, JR., "T. L."
New Orleans, La.

Agriculture

"Such notes, as warbled to the string,
Drew iron tears down Pluto's cheek."

Age, 22 Height, 5'-8½" Weight, 135

Kappa Alpha Fraternity; Varsity Track Squad (2); Chief Trumpeter (3); Rural Science Club; Country Gentlemen (4); Pullen Literary Society; Literary Editor *Red and White* (3); Editor-in-Chief (4); Associate Editor *Wau Gau Rac* (4).

Being a man of great literary taste, Bayne has achieved the honor of being Editor-in-Chief of the *Red and White*. He is quite a song bird, and on Sundays his melodious voice may be heard pealing forth from Christ Church Choir. He is very quiet, but of late he has turned his mind to thoughts of society and is fast becoming a shining star.

HERMON VON BIBERSTEIN, "Dick"
Charlotte, N. C.

Civil Engineering

"Talk to him of Jacob's Ladder and he will ask the number of rounds."

Age, 20 Height, 6'-1" Weight, 158

Pullen Literary Society; Hornets Club; Civil Engineering Society; Company Q.

To be red headed is a gift if the head of your department is also red headed. Biberstein is the original study fiend; his lamp burns always to the last. As an architectural draftsman he has no equal. Judging from his manly beauty he should be a winner among the ladies, but along these lines he is total failure, being very shy.

ENOS CLARKSON BLAIR, "Enos"
Raleigh, N. C.

Agriculture

"Fain would I climb but that I fear to fall."

Age, 22 Height, 6' Weight, 155

Alpha Zeta Fraternity; Y. M. C. A.; Lenax Literary Society; Biological Club; Rural Science Club; Country Gentlemen; Honor Graduate, Captain Company G (4).

Rain or shine Enos has never yet been known to board a street car. His walking serves a double purpose; he gets the required amount of exercise and also the necessary practice for drilling. It was Enos who introduced the practice of carrying the sabre at right shoulder arms.

VICTOR WINFRED BREEZE, "Vic"
Durham, N. C.

Civil Engineering

"Small in stature, but often wise in judgment."

Age, 24 Height, 5'-9½" Weight, 120

Y. M. C. A.; Pullen Literary Society; Civil Engineering Society; President (4); Honors in Scholarship (1), (2), (3); Company Q (4); W. L. C.

Behold West Raleigh's foremost surveyor. He is constantly seen with a blue print under one arm and his chief adviser, Archie Doolittle, under the other. At night he seems to have an engagement at a certain number on a certain street in Raleigh eight days in the week. He has combined in him the qualities which go to make up a successful man and a true friend.

CHARLIE MEEKINS BRICKHOUSE, "Brick"
Columbia, N. C.

Agriculture

"Fine sense is not half so useful as common sense."

Age, 23 Height, 5'-10" Weight, 185

Scrub Football (2), (3); Class Football (2), (3); Biological Club; Leazar Literary Society, Y. M. C. A.; Rural Science Club; Country Gentlemen.

"Brick's" rotund form shows everything that his name implies. Anybody who has scuffled with him will admit that he is some man. He wears his eye-shade from seven to eleven and may be found at his desk during the whole period for study. He swears he will pass Freshman Math at least in four years.

JAMES RAMSEY BUCHANAN, "Buck"
Dillsboro, N. C.

Electrical Engineering

"Now in the name of all the gods at once,
Upon what meat does this our Caesar feed
That he has grown so great?"

Age, 23 Height, 6'-1" Weight, 160

Honors in Punctuality (1), (2), Honors in Scholarship four years, Y. M. C. A., Major of Battalion (4); Vice-President Electrical Engineering Society (4); Assistant Editor-in-Chief AGROMECK (4).

This is our high and mighty Major. He eats Freshmen for breakfast, and when he goes down town they scatter like rats before him. But "Buck" is something more than a major. Through his stern military exterior shines the boundless good nature and sterling qualities of a thorough gentleman, and he numbers his friends by the score.

HARLEY WILSON BULLARD, "Preacher"
Chadbourne, N. C.

Agriculture

"Better a blush in the face than a blot in the heart."

Age, 25 Height, 5'-10" Weight, 135

Leazar Literary Society; President Biological Club (4); Vice-President Rural Science Club (4); Y. M. C. A. Cabinet (3); (4); B-Ag Society; Assistant Instructor Soils Laboratory (4); Chi Club; Country Gentlemen.

We are inclined to think that circuit riding would have become this august personage better than farming. He is easily teased, but the only indication of anger is an innocent blush—never an oath. He has won for himself the confidence and admiration of the heads of the college.

HENRY BURLESON, "Preacher"
Plumtree, N. C.

Electrical Engineering

"To fall in love is awfully simple,
To fall out of it is simply awful."

Height, 6' Weight, 160

Honors in Punctuality; Leazar Literary Society; Y. M. C. A.; Electrical Engineering Society; First Lieutenant Company G (4).

"Preacher" is a smooth, easy going article, but does not possess that seraphic innocence that his name and appearance might suggest. We feel sure that he could give convicting evidence regarding some nocturnal happenings on our campus which still remain mysteries. In affairs of love "Preacher" adheres very closely to the principle of The Survival of the Fittest.

ROBERT OLIN CALDWELL, "R. O."
Concord, N. C.

Agriculture

"All places that the eye of heaven visits
Are to the wise man ports and happy havens."

Age, 23 Height, 6' Weight, 164

Leazar Literary Society; Biological Club; Country Gentlemen; Y. M. C. A.; Class Football (3); Class Basketball (3); Company Q.

"R. O." is a man of great power of intellect. He is stern, yet yields to reason; affectionate, but not fawning; sincere, yet full of jovial wit, and honest in the strictest sense. He is seldom seen without Mike, both of them being "Vets." He is a real worker and a man of facts as well as theories.

WILLIAM GRAHAM CALDWELL, "Baldy"
Huntersville, N. C.

Agriculture

"There is a deal of devilry beneath his mild exterior."

Age, 22 Height, 5'-9 1/2" Weight, 150

Pullen Literary Society; Biological Club; Y. M. C. A.; Hornets; Class Football (2); Country Gentlemen.

"Baldy" is one of the Mecklenburg "Hornets" though he does not buzz loudly. He belongs to all the Agricultural societies, and can sometimes be persuaded to speak before his Literary Society. His best qualities are his sense of humor and his loyalty to his friends. "Baldy" will make good, but you will have to read about it in the papers as he will never tell you.

EDWIN LACY COBLE, "Lacy"
Greensboro, N. C.

Agriculture

"When toward the Devil's house we tread
A woman is a thousand steps ahead."

Age, 23 Height, 5'-10" Weight, 143

Biological Club; Guilford County Club; Country Gentlemen; Class Baseball (3); Company Q.

Lacy has made two notable discoveries in his life. He has found that Guilford College is no place to learn to farm, and that the way to tease "Baddy" Caldwell is to tickle him on the back of the head. Whenever he wants amusement in the class room he goes to "Baddy" for it, but otherwise he goes in quest of the fair sex.

DAVID DAVIES COX, "D. D."
Webster, N. C.

Mechanical Engineering

"He is a soldier fit to stand by Caesar
And give direction."

Age, 21 Height, 6'-11 1/2" Weight, 170

Mechanical Engineering Society, President (4); Circulation Manager *Wau Goo Ror* (4); Associate Editor *Agromeck* (4); Class Football (3); Secretary Athletic Association (4); First Sergeant Company C (3); Captain Company A (4).

Here is a fellow well met and one you may always depend on. A student from the ground up, but is never so wrapped up in his studies that he will not go in for anything you name. He is happiest when handing out the old line. Is a great admirer of the ladies and has had some experience with love. He is bound to succeed.

ST. JOHN COX, "S. J.," "Jackie"

Webster, N. C.

*Mechanical Engineering**"Love conquers all things; let us yield to love."*

Age, 23 Height, 5'-10" Weight, 150

Mechanical Engineering Society; Honors in Scholarship (2); Commencement Marshal (3); First Sergeant Company B (3); Captain Company B (4).

A saint in name only, as he is always on hand for anything to disturb the peace of Watauga Hall. Business interests (?) in Greensboro, with frequent trips to that city, occupy a large portion of his time, and his daily mail is a valuable asset to his happiness. However, a portion of his time is devoted to obtaining an education, especially in Math.

LELAND MIOT CRAIG, "Cupid"

Charlotte, N. C.

*Civil Engineering**"Measure not a man by his stature—Remember Napoleon was a small man."*

Age, 24 Height, 5'-3" Weight, 110

Y. M. C. A.; Cabinet (4); Honors in Scholarship (1), (2), (3); Track Team (1); Pullen Literary Society; Civil Engineering Society; Hornets; Art Editor Agromeck (4); Art Editor *Red and White* (4).

To adequately describe this versatile member of our class the pen should be dipped in the dust from the wings of the butterfly. But beware—There is no feminine heart too elusive for him to win, and then to break (except one). He is ever ready with his talented pen to amuse us or to lead us along the mysterious pathways of higher Math.

WOODFIN GRADY CREDLE, "Credle"
Swan Quarter, N. C.

Agriculture

"Thou foster-child of silence and slow time."

Age, 21 Height, 5'-11" Weight, 148

Y. M. C. A.; Leazar Literary Society; Biological Club; Country Gentlemen; Company Q

This man has the long head of a card player. He is quiet, deliberate, and mindful of no one's business but his own; but he is anything but a tight-wad. To see him in a hurry would be to see the eighth wonder, but he never fails to get there just the same.

SAMUEL FREDERICK DAVIDSON, "David"
Swannanoa, N. C.

Agriculture

"The better part of valor is discretion."

Age, 21 Height, 6" Weight, 170

Y. M. C. A.; Buncombe County Club; Biological Club; Country Gentlemen; Class Baseball (3); Second Lieutenant Company G (4).

Like the Land of the Sky from whence he hails he is dear to every one who really knows him. Retiring and discreet, he possesses a manner that is much to be admired. He is of the type that constitutes the mainstay of the colleges, a man of averages. He has but one enemy, and that is Freshman Math.

ARCHIE JAY DOOLITTLE, "Archie"
Passaic, N. J.

Civil Engineering

"Few things are impossible to diligence and study."

Age, 23 Height, 5'-11" Weight, 145

Pullen Literary Society, President 4; Y. M. C. A.; Civil Engineering Society, Associate Editor *Red and White*; Second Lieutenant Company B 4.

If names were representative of deeds Archie's should be "Doomuch." Since coming to A & M in our Junior year this Yankee boy has set a pace that is hard to follow. Besides being a good student, he is a good fellow as well. Two marked characteristics of Archie are his love for Mr. Hurley's "zip" and his awful neatness.

ARCHIE ARRINGTON FARMER, "Archie"
Wilson, N. C.

Electrical Engineering

"None but himself can be his parallel."

Age, 22 Height, 5'-11" Weight, 162

Varsity Baseball four years; Captain, 3; 4; Coach Class Baseball 1; 2; 3; Class President, 2; Assistant Manager Varsity Basketball 3; President Oak Ridge Club 4; President Athletic Association 4; Electrical Engineering Society, First Company Q.

Archie came into our midst quietly, but soon became very, very famous for a number of things. We have become used to seeing him knock the ball over the fence most any time; but the astonishing line of conversation he hands out is still fresh and green, especially his Florida dope, gathered while in that southern clime.

KARL McATEE FETZER, "Fet"

Reidsville, N. C.

Electrical Engineering

"Patience, and shuffle the cards."

Age, 22 Height, 5'-7" Weight, 142

Kappa Sigma Fraternity; German Club, Vice-President (4); Associate Editor *Red and White* (2), (3); Electrical Engineering Society; First Lieutenant Company C (4); Editor-in-Chief *Agromeck* (4).

His being Editor-in-Chief of the *Agromeck* expresses our confidence in his literary ability. He is also "Speaker of the House" in "Congress." His devotion to the fair sex is clearly shown by the many letters he writes, and by the volumes he daily receives from the same source. Although he studies occasionally, his motto is "Pleasure before work."

JAMES FONTAINE, "Fonny"

Woodsdale, N. C.

Electrical Engineering

"Pleased with a rattle, tickled with a straw."

Age, 25 Height, 5'-9" Weight, 165

Y. M. C. A.; Lazar Literary Society; Company Q (4); Secretary and Treasurer Electrical Engineering Society (4); Associate Editor *Red and White* (3); Honors in Scholarship, four years.

"Fonny" is always to be found on the front seat with a hungry look for knowledge. Besides being a good student he is some musician. "Fonny" has his kiddish side as well, however. He plays with dangerous machines as if they were only toys. Until electrocuted by some childish prank we predict for him a brilliant success.

WILLIAM BENJAMIN FOSTER, "Ben," "W. B."
Winston-Salem, N. C.

Mechanical Engineering

"Men would be angels; angels would be gods."

Age, 28 Height, 6'-13 $\frac{1}{4}$ " Weight, 180

Leazar Literary Society, Y. M. C. A.; Recording Secretary (3); President (4); Chairman Honor Committee (4); Class Baseball (1), (2); Captain (2); Scrub Baseball (2); Sub Varsity Baseball (3); Class Football (2), (3); Captain (3).

Although he was disappointed when he failed to get the Presidency of the Y. M. C. A. and Honor System, his ambitions are now apparently satisfied, for lo! Providence has thrust both of these positions upon him. A & M has never turned out a better engineer (?) but we fear that he will some day give up engineering and enter the ministry.

JAMES ROSCOE FRANK, "Roscoe"
Richlands, N. C.

Agriculture

"Yet love has found the way."

Age, 24 Height, 5'-10" Weight, 145

Chi Club; Biological Club; Country Gentlemen; Company Q

Though ever sincere with his lady friends, "Roscoe" is forever joking among the boys. The presence of a Prof. is no restraint when he is ready to make himself heard, for he is no respecter of persons. He is one of the few that have never been accused of legging the instructors. Though this is great, it is only one of his many admirable qualities.

JOHN GEORGE HARVEY GLITNER, JR., "Blondy"
Hickory, N. C.

Textile

"You look wise— pray correct that error."

Age, 20 Height, 5'-9 1/2" Weight, 175

Sigma Nu Fraternity; Tompkins Textile Society; President '14; Assistant Manager Varsity Track Team '13; Sergeant Company B '15; First Lieutenant Company A '14.

This young chap hails from Hickory. Along with Shaw and McNeely he composes the Textile contingent. He has accomplished one great feat while in college and that was to secure a "leg" on Prof. B. Moore Parker. He also stands in with "Ooks" and we fear it is only a question of time before his influence will change Hickory to Hickory.

RALPH ALLISON GILL, "Pretty"
Statesville, N. C.

Electrical Engineering

"A lion among ladies is a most disturbing thing."

Age, 21 Height, 5'-10" Weight, 145

Sigma Phi Epsilon Fraternity; Class Baseball (1), (2), (3); Captain Class Basketball (1); Sub Varsity Basketball (3); Floor Manager German Club (3); Secretary and Treasurer (4); Scrub Baseball (2), (3); Electrical Engineering Society; Associate Editor AGROMECK (4).

The latest thing in lady killers. Note the cool, calm brow and the delicately tinted cheek. Think not you can resist him, ladies! It's just not done, that's all. Oh yes, he does other things too. He plays scrub baseball; would play Varsity if they would let him, only they won't.

WILLIAM HENRY GRIFFIN, JR., "Willie"
Goldsboro, N. C.

Civil Engineering

"A heart to resolve, a head to contrive, and a hand to execute."

Age, 22 Height, 6' Weight, 146

Y. M. C. A., Civil Engineering Society, Librarian (4); Pullen Literary Society; Wayne County Club, President (4); Company Q (4); W. L. C.

Willie, though light in weight, is there with the goods when it comes to hard work. Although studiously inclined he likes to go with the boys. His highest ambition is to get a good "leg" on Prof. Riddick. He was for a time official rodman for the Riddick-Mann-Poole Co., but has lost out to his friend Breeze.

JOHN HARVEY, JR., "Harvey"
Snow Hill, N. C.

Civil Engineering

"When there's a lady in the case,
You know all other things give place."

Age, 21 Height, 6' Weight, 163

Sigma Nu Fraternity; Saints; German Club; Floor Manager (2); Secretary and Treasurer (3); Y. M. C. A.; Class Historian (1); Buildings Committee (2); Civil Engineering Society; Company Q (4).

There is not a better fellow made than this son of Snow Hill. Did you ever notice how he holds his cane? Always at an angle of ninety degrees to the sidewalk. His great failing is the Country Club, where he goes to skate on the ice (?). When on the campus he is usually looking for his friend "Aus."

FRANK HENRY HOUCK, "Mabel"
Hickory, N. C.

Mechanical Engineering

"Oh! that such beauty should be so devoid of understanding."

Age, 23 Height, 6'5 1/2" Weight, 170

Mechanical Engineering Society; Class Football (3); Varsity Track Squad (3); Company Q (4).

Delicate and refined in his tastes, by disposition shy, "Mabel" is not a student by nature. However, he converses freely along engineering lines, and is considered by some to be a walking encyclopedia. When the potter shaped this lump of clay into a mortal form, a strange mixture did he make. He believes in taking the campus course.

JOHN FRANCIS HUETTE, "J. F."
Thomasville, N. C.

Mechanical Engineering

"Earth sounds my wisdom and heaven gives me fame."

Age 25 Height, 6'-1" Weight, 170

Quartermaster and Color Sergeant (3); Captain and Quartermaster (4); Leazar Literary Society; Vice-President (4); N. M. C. A.; Cabinet (4).

Minds his own business, but if you need help call on him. "Slow but sure" is the motto that he follows. He is endowed with the gift of quietude by nature and very little is known about him. A hard worker and a good student along all lines, he will be bound to succeed in life, and with him go the best wishes of his friends.

WILLIAM TISDALE HURTT, "Dock," "Fesset Willie"
New Bern, N. C.

Mechanical Engineering

"With volleys of eternal babble."

Age, 23	Height, 6'-2"	Weight, 197
---------	---------------	-------------

Pullen Literary Society; Mechanical Engineering Society; Charter Member Fion; Y. M. C. A.; Vice-President Athletic Association (3); President (4); Varsity Track Team four years; Varsity Football four years; Captain (4); Instructor Forge and Foundry (3), (4).

"Dock" is primarily and distinctively an athlete. To see him perform on the track or gridiron are feats no A & M man cares to miss. In the classroom he stands among those at the top. In him we have a good companion and a solid friend. Quick, determined and persistent, we predict a future of success for him.

WILLIAM LEON JEWELL, "Hop"
Wilmington, N. C.

Civil Engineering

"An honest man's the noblest work of God."

Age, 23	Height, 5'-10"	Weight, 147
---------	----------------	-------------

Captain Class Baseball (1); Honor Committee (2); Assistant Manager Varsity Football (3); Manager (4); Fion; Civil Engineering Society; Company Q (4); Senior Quartet.

Ask him why gold fish die when put in hot water, and he will refer you to his friend "Jim." His highest ambition is to ask Prof. Riddick a sensible question. He feels as if he has accomplished a good and charitable deed if he can persuade his roommate "Dug" Leard to stay in his room for an hour and study.

LACY JOHN

Lumber Bridge, N. C.

Agriculture

"When conscience wakens who can with her strive?"

Age, 25 Height, 5'-11" Weight, 165

Bi-Ag Society; Vice-President Rural Science Club; Vice-President Biological Club; Chairman Social Committee Y. M. C. A.; Punctuality Roll (2), (3); Chi Club; Leazar Literary Society; Captain Company F (4).

John came from the wilderness of Robeson. We hope ere long he will be preaching to Croatan and Scotchmen the doctrine of Scientific Agriculture. He is an advocate of strict business. When he became a man he put away childish things.

WILLIS NEAL JOHNSTON, "Wood," "Pluto"

Mooresville, N. C.

Mechanical Engineering

"Why should I worry?"

Age, 22 Height, 5'-8½" Weight, 112

Mechanical Engineering Society; Iredell Teech; Secretary (4); Class Baseball (3); Tennis Club; Midnight Crew; Company Q; Y. M. C. A.

"Pluto" hails from Mooresville, the "Metropolis" of the State. He is one who always looks on the sunny side of life, and succeeds without any apparent effort. He has his own original ideas about everything except Calculus, a subject upon which he has thus far been unable to form an opinion. His friends are all who know him.

WILLIAM MANLY JONES, "Sam-I"
Raleigh, N. C.

Mechanical Engineering

"Ah, you flavor everything; you are the spice of society."

Age, 20 Height, 6' Weight, 130

Mechanical Engineering Society.

Hails from Raleigh, the home of the Bush-Women, although we do not mean to associate him with them. He is something of a ladies' man, and tradition has it that he has once been arrested for his daring. A Math. genius especially along the lines of Calculus. We wonder what will happen when he leaves Raleigh, for we feel sure that his august presence will be sadly missed at Peace, St. Mary's and Meredith.

SIR KEITH KELLER, "Keller"
Wadesboro, N. C.

Civil Engineering

"How beautiful's mankind is!"

Age, 24 Height, 5'-10" Weight, 150

Civil Engineering Society; Company Q.

He has two distinctions of great merit, being "P. G.'s" right hand man and A & M's official authority on Mexico and Mexican affairs. He attends strictly to his own business. We don't know whether he really hails from Florida or from Wadesboro, N. C., as he talks about both as home. When not on class he may be found at "P. G.'s" office or at "Charlie's Lunch Room."

PAUL KING, "P"

Emporia, Va.

*Civil Engineering**"The truly great are always modest."*

Age, 21 Height, 5'-8½" Weight, 138

Civil Engineering Society; Company Q.

"P" as he is known to the boys, came to us from our old rival, V. P. L., to spend his Senior year. Although his stay has been brief he has won the friendship of all with whom he has come in contact. He has the sterling quality of being able to attend strictly to business without letting business interfere with his education.

NATHAN SAMPSON LACHICOTTE, "Nat"

Waverly Mills, S. C.

*Agriculture**"Here's champagne to our real friends and real pain to our sham friends."*

Age, 22 Height, 5'-8" Weight, 172

Class Baseball (1); South Carolina Club; German Club; Assistant Manager Varsity Football (3); Manager (4); Company Q; Suits; Pi Kappa Alpha Fraternity; Theta Nu Epsilon Fraternity.

"Five long years have I sought thee, dear 'Dip,' and now that I have thee, we will fare forth and startle the natives."

Nat may be found at one of two places when wanted—serenely reposing in bed or leaning on the window sill of Brantley's drug store, whither he has gone to see that Fayetteville Street has not departed since yesterday.

DOUGLAS ALLEN LEARD, "Dug"

Norfolk, Va.

*Civil Engineering**"When words are scarce they are seldom spent in vain."*

Age, 24 Height, 5'-11" Weight, 162

Y. M. C. A.; Map Squad (3); Civil Engineering Society; President (4); Associate Editor AGROMECK (4); W. L. C.; Company Q.

A brilliant combination of artist, detective, and author. His artistic temperament is most highly developed in beautiful and instructive paintings on tanks and railway stations. He has discovered who got the Y. M. C. A. ice cream and who blew the fire whistle. He has written an article on handling bears and also a volume on explosives.

WILLIAM DIXON LEWIS, "Bill"

Gastonia, N. C.

*Agriculture**"His modesty the cottage might adorn."*

Age, 24 Height, 5'-10" Weight, 150

Alpha Zeta Fraternity; Y. M. C. A.; Chi Club; Biological Club; Country Gentlemen; Class Baseball (3); First Lieutenant Band (4).

"Bill" is a man of immaculate character. True to himself and to his friends, he has the good will of every one who knows him. He is one of the few who have never made an enemy. He is steady in his work as in everything else. Under-estimation of himself is his greatest fault.

WILLIAM BENNETT LITTLE, "Bill"
Wadesboro, N. C.

Agriculture

"Pleasures are like liquors; they must be drunk, but in small glasses."

Age, 22 Height, 5'-11" Weight, 130

Kappa Sigma Fraternity; Saints; German Club; Vice-President (4); President Country Gentlemen (4); President Tennis Club (4); Class Secretary and Treasurer (4); Honors in Scholarship for 7 years; Associate Editor AGROMECK (4); Associate Editor *Wau Gau Roc* (4).

"Bill" hails from Anson County, and his highest ambition is to be a farmer. He can generally be found hanging out in Fet's room, and most always has a deck of cards and an unlighted cigar in tow. The only things he hates are missing the ten-thirty car and losing in a bridge game. He is true as steel to his many friends.

MARION LAMAR LIVERMAN, "Runt"
Roxobel, N. C.

Civil Engineering

"And the loud laugh bespoke the vacant mind."

Age, 21 Height, 5'-6" Weight, 135

Y. M. C. A.; Corresponding Secretary (4); Pullen Literary Society; President Senior Debate (4); Associate Editor *Red and White* (3), (4); Class Baseball (1), (2), (3); Scrub Baseball (3), (4); Company Q.

A tremendous noise in Watauga Hall made by the can rollers and other thugs is a sure sign for Inspector Liverman to rush forth, and find no one. His greatest sport is legging the Prof.; in this branch of athletics he has won a monogram and three stars. He is a good student and a hard worker. His only fault is his roommate.

THOMAS ROBERT MCDEARMAN, "Squire Mac"
Rocky Mount, N. C.

Civil Engineering

"Yon Cassius has a lean and hungry look,
He thinks too much; such men are dangerous."

Age, 24 Height, 6'-2" Weight, 168

Civil Engineering Society; Scrub Baseball (1), (2),
(3), (4); Company Q.

Never cares which way the world turns just so he is on top. He came here to get an education and he has accomplished his desire. His favorite sport is Calculus, his only rival in this line being "Theta" Yates. His friends have never been able to find out why he attends choir practice so regularly and yet never sings in church. As a student he is one of fourteen's best.

JAMES EDGAR MCNEELY, "Mac"
Mooreville, N. C.

Textile

"The village all declared how much he knew."

Age, 22 Height, 5'-11" Weight, 140

Tompkins Textile Society; Surgeon Company Q (4),

Although he started into his college career on the long and narrow path to a degree in Mechanical Engineering, he soon decided that he would make a better "lint-head" than a "grease-wiper." His motto in regard to Bill Shaw is, "Whither thou goest I will go." He fully agrees with Wood Johnston when he says that Mooreville is the "Met-ro-pó-lis" of the South.

HARVEY CAMPBELL McPHAIL, "Mac"
Mount Olive, N. C.

Agriculture

"Thought is the measure of life."

Age, 22 Height, 6'-1" Weight, 160

Y. M. C. A.; Biological Club; President Rural Science Club (4); Leazar Literary Society; Bi-Ag Society; Secretary Bi-Ag (4); Honors in scholarship two years; Country Gentlemen; First Lieutenant, Company F (4).

Being inflamed with the desire for learning, "Mac" gives little time to aught but his books. He is no respecter of persons and will "ram" anybody, even to the janitor. He has little patience with wine, women, or song; and positively none for anybody who attempts to mimic him. He is a practical man and stands high in his classes.

JOSEPH EDGAR MICHAEL, "Mike"
Elon College, N. C.

Agriculture

"Laughing cheerfulness throws sunbeams on all the paths of life."

Age, 19 Height, 5'-9" Weight, 150

Y. M. C. A.; Chi Club; Country Gentlemen; Leazar Literary Society; Drum Major Band (4).

"Mike" is truly a clown and a natural wit. He makes friends at first sight, but not one has he ever lost. Though long a real woman hater, he has fallen at last, and very great was the fall. We sympathize with him in his troubles, yet there is no pleasure like the pain of being loved and loving.

THOMAS GUY MONROE, "Monroe"
Eagle Springs, N. C.

Agriculture

"Among the sons of men how few are known."

Age, 22 Height, 5'-10" Weight, 155

Y. M. C. A.; Lenzar Literary Society; Biological Club; Bi-Ag Society; Chi Club; Country Gentlemen; Rural Science Club; Company Q.

One has only to know Monroe to like him, but he must be known to be appreciated. He is steady, straightforward, and business-like; a little cold to strangers but affectionate to his friends. We are sure that the sand hills of Moore will profit by his scientific knowledge.

WARREN LAFAYETTE MOODY, "Warren"
Concord, N. C.

Chemistry

"Come and trip it as you go,
On the light fantastic toe."

Age, 20 Height, 5'-8" Weight, 143

Kappa Sigma Fraternity; Saints; German Club; Floor Manager 4; Class Baseball (2), (3); Berzelius Chemical Society; Associate Editor AGROMECK; Second Lieutenant Company A (4); Senior Quartet.

Our most accomplished exponent of the ultra-modern in dancing. To see him execute the puzzling intricacies of the "Lame Duck" or the "Hesitation" is a liberal education in the Terpshorean art. He is the only man in college that gets his money's worth from the postoffice. His state of happiness depends upon his daily mail.

FRANK BULLOCK MORTON, "Frank"
Townsville, N. C.

Electrical Engineering

"O, these barren tasks, too hard to keep,
Not to see ladies, study, fast, not sleep!"

Age, 21 Height, 6'-1" Weight, 187

Y. M. C. A.; Electrical Engineering Society; Class Football (1), (2); Scrub Football (2); Varsity Football (3), (4); Class Basketball, four years; Class Base-
ball (1), (2).

Frank loves but two things, sleep and the movies. When he is on class his flaxen head may be seen serenely reposing on Plyer's shoulder. When not on class he follows his other love; but the strange part of it is that he always patronizes the "Lyric" and always sits on the front seat. Doubtless some mystic attraction lures him there.

HENRY KOLLOCK NASH, JR., "Sober"
Wilmington, N. C.

Agriculture

"What a blunt fellow this is grown to be."

Age, 24 Height, 5'-10" Weight, 150

Sigma Nu Fraternity; Varsity Track Team, four years; Associate Editor *Wan Gau Rac* (2); Assistant Editor-in-Chief (3); Editor-in-Chief (4); Class Historian (2); Y. M. C. A.

"Sober" and his note book may be seen whenever anything of value to newspapers happens. As the head of the *Wan Gau Rac* he is peerless. His stirring editorials have reached the heart of every student in college. With his slogan of a bigger and better *Wan Gau Rac* he has pushed the paper to the front.

THOMAS WINSTON NICHOLLS, "Tommie"
Edenton, N. C.

Electrical Engineering

"The ladies! Our arms their defense,
Their arms our recompense!"

Age 22 Height, 5'-10" Weight, 158

Kappa Alpha Fraternity; Class Poet (1); Class Football (1), (2), (3); Captain (1); Scrub Football (1), (2), (3); Captain (3); Electrical Engineering Society; Varsity Track Team (3), (4); Vice-President Class (4).

On Sunday afternoons "Tommie's" manly voice may be heard filling St. Mary's Chapel with refreshing strains; and on Saturday nights the same voice, though pitched in a lower key, whispers to an audience of one. His only fault is an entire absence of bad habits; but he will doubtless recover from this when he arrives in the wicked city of Chicago, whither he is bound.

EDGAR B. NICHOLS, "Nick," "Fesser"
Mt. Airy, N. C.

Mechanical Engineering

"I could succeed in small things, were I not troubled with great ambitions."

Age 24 Height, 5'-11 1/2" Weight, 165

Y. M. C. A.; Corresponding Secretary (2), (3); Associate Editor *Red and White* (3), (4); Leazar Literary Society, President (4); Mechanical Engineering Society, President (4); Varsity Track Team (2), (3); Class Football (2), (3); Instructor Forge and Foundry (3), (4).

"Nick" took up "Faculty life" to enjoy the privilege of being addressed as "Fesser" by the innocent Fresh. He has won the respect of both his classmates and the Faculty. He may often be found at one of the colleges for the fair sex, where it is said he intends to establish a course in Forge.

FITZGERALD ELIZUR PATTON, "Pat"
Pisgah Forest, N. C.

Agriculture

"Behavior is a mirror in which every one displays his image."

Age, 22 Height, 6'-1" Weight, 175

Y. M. C. A.; Pullen Literary Society; Chi Club; Biological Club; Rural Science Club; Country Gentlemen; Company Q.

He is seldom seen and yet more seldom heard. A maiden is to him a mortal antipathy. He carries the A & M colors but never gets mad. Nor is he ever in danger, for "God loves the Irish." He is lazy to look at and goes buzzing and bumming around, but when it comes to a showdown he delivers the goods.

WILL ROBERT PATTON, "Pat"
Morganton, N. C.

Civil Engineering

"Still waters run deep."

Age, 24 Height, 5'-11" Weight, 162

'Varsity Baseball four years; Class Football (1), (2); Captain (2); Sub 'Varsity (2), (3); Pullen Literary Society; President (4); Vice-President Athletic Association (4); Civil Engineering Society.

Don't butt in on him and ask him a question, because he might look as if he doesn't like you; but he does. Draw up a chair and when he opens up you will want to stay awhile. Judging from his countenance he has been very appropriately named "Pat." As an athlete he is hard to beat. His ability to think clearly, speak forcefully, and work earnestly predicts a bright future for him.

MILTON VANCE PERRY, "Commodore"
Durants Neck, N. C.

Mechanical Engineering

"Be silent and safe; silence never betrays you."

Age, 20 Height, 5'-10½" Weight, 150

Leazar Literary Society; Mechanical Engineering Society, Secretary (4); First Lieutenant Company B (4).

One of the most unassuming men of his Class. Quiet, studious, and a hard worker, he has attained the goal for which he came to college—an education. Although he gives one the impression of being a woman-hater, we believe that in some southern town resides the lady of his choice, for daily are his trips to the post-office.

HENRY MARRIOTT PHILIPS, "Henry"
Battleboro, N. C.

Agriculture

"Then he would talk—Ye Gods! How he would talk."

Age, 22 Height, 6'-2" Weight, 210

Y. M. C. A.; Chi Club; Biological Club; Country Gentlemen; Second Lieutenant Company C (4).

His greatest ambition is to lose forty pounds of flesh without foregoing any items in his daily menu. His next highest ambition is to procure for himself a better-half, settle down, and become a farmer of great repute. We sincerely hope that both may be fully realized. He is always one of the boys and a good sport.

ARTHUR JEFFERSON PHILLIPS, JR., "Jeff"
Portsmouth, Va.

Mechanical Engineering

"'Tis the voice of the sluggard; I hear him complain:
'You waked me too soon, I must slumber again.'"

Age, 22 Height, 5'-10" Weight, 165

Kappa Alpha Fraternity; Saints; German Club; President (3); Mechanical Engineering Society; Varsity Basketball four years, Captain (3), (4); Assistant Manager Track Team (3); Varsity Football (2), (3), (4), Company Q (4).

He is the same Jeff to every one, a man who looks at life with the ease of a prince. He is a brilliant compendium of attractive virtues and equally attractive faults. Has never been known to hurry. He is a good athlete along the lines of football and basketball. Among his classmates he stands as a friend, and with him go their best wishes.

ROBERT AVERY PLYLER, "P" Monroe, N. C.

Electrical Engineering

"Sir, I am a polished gentleman;
Do I deceive my looks?"

Age, 21 Height, 6' Weight, 195

Y. M. C. A.; Union County Club; Fion; Leazar Literary Society; Class Football (1), (2); Scrub Football (1); Sub Varsity (2); Varsity (3), (4).

Threatens to change to Agriculture whenever he has to look into a galvanometer, but he is still a good student in Electrical Engineering. He likes A & M so well that he is going to take a year of post work. He has plenty of nerve, but absolutely draws the line when it comes to doing goat-riding stunts.

FRED DAVIS POISSON, "Windy"
Wilmington, N. C.

Chemistry

"Verily, verily I say unto you, great is the quantity of wind he putteth forth, and exceeding small the quality thereof."

Age, 23 Height, 5'-9" Weight, 150

Sigma Nu Fraternity; Commencement Marshal (2); German Club; Floor Manager (2); President (3); Berzelius Chemical Society; Company Q.

Behold the King of "Paradise Alley," successor to Kid Taylor. He likes A & M so well that he has stayed five years. Fred knows every one in Raleigh and is well posted on past and present occurrences at A & M. As he hails from Wilmington he is greatly gifted with lady-killing powers.

TRACY WINCHESTER PORTER, "Tracy"
Charlotte, N. C.

Agriculture

"Care is an enemy to life."

Age, 21 Height, 6'-1" Weight, 195

Y. M. C. A.; Lenzar Literary Society; Scrub Football (2), (3), (4); Class Football (2), (3); Class Basketball (3), (4); Class Historian (4); Biological Club; Hornets; Country Gentlemen; Company Q.

The Class of '14 owes not only much of its athletic record to this big boy, but also a large part of its class spirit. Tracy was a live wire in his Sophomore year, and is still full of the old spirit. If he does not return to Charlotte when he dies his greatest ambition will not be realized.

WILLIAM OWEN POTTER, "W. O."

Cash Corner, N. C.

Mechanical Engineering

"Every man is like the company he is wont to keep."

Age, 24 Height, 5'-6" Weight, 156

Y. M. C. A.; Mechanical Engineering Society;
Class Football (3); Varsity Track Team four years,
Captain (4).

Little did we realize when he entered college, that such a strange combination was among us. While a large part of his time is given to work, especially the "Vaughan Course," he is quite energetic along other lines. "Potter call 9876-R" is a fair specimen of the notices received by him, for he is a star performer among the ladies.

MILLARD REED QUINERLY, "Quinerly"

Grifton, N. C.

Agriculture

"What is strength without a double share of wisdom?"

Age, 20 Height, 5'-6" Weight, 115

Alpha Zeta Fraternity; Longar Literary Society;
Senior Debate (4); Treasurer Y. M. C. A. (3), (4);
Chairman Finance Committee (3), (4); President
Biological Club (4); Associate Editor Wau Gau Rar;
Chi Club; Honor Graduate.

Quinerly is a big, little man; a man of diminutive stature but a master mind. When he entered college he could barely shoulder his rifle, but before long he had cleared the ranks of average men. This lead has not only been maintained, but has steadily increased.

JOHN BARTOW REES, "Jack"

Lincolnton, N. C.

Electrical Engineering

"What can I do to be forever known,
And make the age become mine own?"

Age, 21 Height, 5'-10" Weight, 150

Kappa Alpha Fraternity; Manager Class Baseball (2); Class Baseball (2), (3); Class Basketball (2), (3); Class Football (3); Assistant Manager Varsity Basketball (3); Manager (4); Assistant Business Manager *Red and White* (3); Business Manager (4); Chief Marshal Commencement (3).

Jack is the mechanical genius of our class. He is always inventing something, for instance, the famous sine curve machine. As college electrician he is a rare find. The success of the Basketball team and the *Red and White* prove him to be an efficient business man.

THURMAN LESTER ROBINSON, "Buddie"

Robersonville, N. C.

Mechanical Engineering

"And by himself admits no parallel."

Age, 20 Height, 5'-8" Weight, 130

Honors in Punctuality (2); Honors in Scholarship (3); Mechanical Engineering Society; Leazar Literary Society.

When this small specimen entered college, little did we realize his greatness. Nature has endowed upon him the enviable characteristics of grace, good looks and wisdom. Although he takes keen interest in social life he does not let that interfere with his college duties. His happiness reigns supreme when explaining some of his varied experiences as a photographer, or in preparing a Calculus lesson.

DANIEL ERNEST ROBERTS, "D. E."
Red Springs, N. C.

Agriculture

"Oh Sons of Earth, attempt ye still to rise!"

Age, 22 Height, 5'-9" Weight, 142

Alpha Zeta Fraternity; Varsity Track Team; Learner Literary Society; Y. M. C. A.; Biological Club; President Rural Science Club (4); Bi-Ag Society; Chi Club; Country Gentlemen.

Roberts has shown himself to be a man of more than ordinary intelligence. Not only has he been a banner man in his four years of class work, but he has been a leader in the Y. M. C. A. and allied activities. He is also a track man of the highest order.

JOHN MORGAN ROBERTS, "Georgia"
Louisville, Ga.

Agriculture

"A man that can't sing and will sing, should be sent to Sing Sing."

Age, 21 Height, 5'-10 1/2" Weight, 150

Y. M. C. A.; Biological Club; Midnight Crew; Associate Editor *Wan Gan Ene*; Associate Editor *Agromeck*; First Lieutenant Company D; Country Gentlemen; Honor Graduate.

He came to us from the state famous for watermelons and "niggers" because they didn't have a place where he wanted to take the X-Y-Z's of his education. He is true to his word, to his school, and loyal to his friends. He is persistent in the defense of his native state, but has come to believe that there are a few "Tar Heel" ladies superior to those of the "Cracker State."

JOE WILLIAM ROSS, "Red"

Fort Mill, S. C.

Agriculture

"Often the cock-loft is empty in those whom Nature hath built many stories high."

Age, 23 Height, 5'-8" Weight, 135

Y. M. C. A.; Biological Club; Country Gentlemen;
Honors in Scholarship three years; Company Q.

"Red" is little and not especially loud, yet he holds his own in any company. Above all things else he loves his Tracy. He is usually good natured, but will fight in a minute if he thinks he is being imposed upon. He is to be admired for this as well as for being a leader in every line of study.

EMERY PELL ROUSE, "Emery"

Lagrange, N. C.

Electrical Engineering

"At lovers' perjuries
They say, Love laughs."

Age, 22 Height, 5'-11" Weight, 133

Punctuality Roll (1); Leazar Literary Society;
Electrical Engineering Society; Company Q.

Emery has had many a tough struggle during these four years, but at last his hereditary enemy, Math., is conquered. Many a flirtation has crossed his path, but of late he has decided that St. Mary's holds the proper goddess for his youthful affections. His inside coat pocket always contains an envelope with the blue engraving in the upper left hand corner.

JOHN FRANKLIN SCHENCK, JR., "J. F.," "Sheep"
Lawndale, N. C.

Mechanical Engineering

"Beauty is the index of a larger fact than wisdom."

Age, 21 Height, 5'-8" Weight, 150

Sigma Nu Fraternity; Mechanical Engineering Society, Vice-President (4); Captain Band (4); Vice-President Class (2); Commencement Marshal (2); Assistant Manager Varsity Baseball (3); Business Manager Agromeck (4).

The twentieth century has fulfilled a mighty destiny by introducing to us the youth whom you see above. Since joining us in the spring of our Freshman year he has proven himself worthy of the respect of students and faculty alike. By some he is considered bashful, but to those of us who know of his regular trips to Meredith, it seems otherwise.

WILLIAM THOMAS SHAW, JR., "Bill"
Weldon, N. C.

Textile

"Gallia est omnis divisa in partes tres"—Peace, Meredith and St. Mary's.

Age, 21 Height, 6' Weight, 170

Kappa Sigma Fraternity; Saints; German Club; President (4); Assistant Manager Varsity Football (3); Tompkins Textile Society, President (4); Assistant Business Manager Agromeck (4); Class President (1); Honor Roll (3); Captain Company D (4); Senior Quartet

In the annual sponsor hunt Shaw has been the quarry, not the hunter. The girls simply won't let him alone. He may be seen in Fayetteville Street every Monday morning fighting them off with a club. His only dissipation is his deep bass voice. You don't have to beg him to sing, just drop a hint.

WALTER HERBERT SMITH, "Slide Rule"
Prospect Hill, N. C.

Electrical Engineering

"Who makes a furnace of his mouth, and keeps the chimney burning."

Age, 24 Height, 5'-11" Weight, 165

Y. M. C. A.; Honors in Punctuality, Electrical Engineering Society; Captain Company C (4); Vice-President Oak Ridge Club (11, 14).

"Slide-Rule" talks a great deal and mostly about Pittsburg, the center of his engineering ambitions. He is an authority on all matters pertaining to his chosen profession. He is also some soldier boy, and heads his company with a proud and gallant step, just as he will some day head the onward march of progress in the electrical world.

ZEBULON WHITEHURST TAYLOR, "Zeb"
Tarboro, N. C.

Electrical Engineering

"Men are but children of a larger growth"

Age, 21 Height, 5'-6" Weight, 145

Kappa Sigma Fraternity; Class Baseball 2; Electrical Engineering Society, Vice-President Class 3; Company Q

For four long years Zeb has threatened to leave us to take up the study of medicine, and even now as we go to press we fear that he may leave most any time. But except for these periodic fits of despondency he is a hard worker. When Analytics and Calculus give him trouble he seeks consolation in the sad melodies of his flute.

DANIEL WOOD THORP, JR., "Dear William"
Rocky Mount, N. C.

Civil Engineering

"Thou hast been diligent in all things."

Age, 23 Height, 5'-10" Weight, 185

Y. M. C. A., Leazar Literary Society; Sergeant Major (3); Captain and Adjutant (4); Civil Engineering Society; President Class (1); Class Football (3); Honors in Scholarship (2), (3).

That he is a good fellow and popular is shown by the high honor given him by the class in making him Senior Class President. He is also Dr. Hill's favorite Senior. How he got this "leg" we do not know, but it has served him well. He is never happier than when worrying his friend "Mac."

JAMES RICHARD TOWNSEND, "Jim"
Greensboro, N. C.

Civil Engineering

"Trust everybody but cut the cards."

Age, 20 Height, 5'-10 1/2" Weight, 160

Guilford County Club; President (4); Fion; Commencement Marshal (3); Honors in Scholarship (1); (2); Captain Company E (4).

Jim is not the serious, sedate, and earnest young man that he looks. He wears that kind of face just for a bluff. The stern and solemn expanse of his manly brow seems to indicate an entire absence of frivolity, but we know him better than that. He believes that life is his own little red apple, and when he gets through eating it, "there won't be no core."

CLYDE LOREINNE VANN, "Possum"
Fayetteville, N. C.

Electrical Engineering

"Oh, Math., thou art a galling task, a weary load!"

Age, 24 Height, 5'-11" Weight, 145

Y. M. C. A.; Leazar Literary Society; Electrical Engineering Society.

"Possum" gets his name, not from his nature, but from his face. He never indulges in any of the frivolous pranks of youth. On class he makes a lot of hieroglyphics which he tells us are his notes in shorthand. Doubtless he uses the Vann system, for no one else can decipher them.

JAMES WIGGINS WATTS, JR., "Wigg"
Williamston, N. C.

Electrical Engineering

"Fie, what a spendthrift he is of his tongue!"

Age, 22 Height, 5'-10" Weight, 140

Honors in Scholarship (3); Electrical Engineering Society; Signal Corps (3), Company Q.

When we hear a loud noise at "Charlie's" we know that's Wigg. He is some artist among the ladies, and especially northerners. Doubtless his style of conversation reminds them of home. His ability to solve momentous problems with lightning rapidity has secured for him his well-known leg on the Profs.

EDWARD HOWERTON WEATHERSPOON, "Eddie"
Sanford, N. C.

Electrical Engineering

"To the ladies whose love is as constant as the wind."

Age, 21 Height, 5'-5" Weight, 125

Y. M. C. A.; Fion; Electrical Engineering Society;
Captain Staff (4).

His stature is no true criterion of his importance in college, nor of his ability to woo. He easily wins any girl, but seems to have some trouble in holding them. He is constantly to be seen at "Charlie's" and we often wonder how a man of such small stature can consume so many "black cows" and smoke so many "two-fors."

OWEN ZELOTES WRENN, "Perch"
Durham, N. C.

Civil Engineering

"Good nature and good sense must ever join."

Age, 24 Height, 5'-10" Weight, 160

Y. M. C. A.; Pullen Literary Society; Secretary (2);
Vice-President Class (1); Manager Class Football (3);
Civil Engineering Society; Vice-President (4); First
Lieutenant Company E.

"Perch" is never happier than when selling two cents' worth for a "jit" at the College Book Store. He has never been known to come to breakfast or answer to an inspection. Goes to Durham every Saturday, but always returns on the seven o'clock since that memorable night when he mistook the lights of Method for those of the Union Station.

Senior Class History

In the fall of 1910 there were one hundred and sixty-five young men from all parts of this and other states who came to this college for their first time. Of course they would have felt better at that time if they had stayed at home. Instead of giving away to that slight feeling of homesickness they have stayed and made themselves known, each in his own way.

In our first year here R. R. Melver was chosen as temporary President. He was succeeded by W. T. Shaw, who was our leader until the end of that year. To him belongs the credit of organizing the class, such as the selection of the colors and putting harmony in class and between classes on a firm basis. Under him we learned the spirit of A & M fellowship.

As Sophomores we were under the leadership of A. A. Farmer. He instilled into us a realization of the importance of respect, especially from our new friends of that year.

As a leader for our Junior year W. R. Patton was chosen. He helped us to throw away our childish ways and assume the dignity and courtliness of Juniors.

D. W. Thorp is President of the Senior Class. At all times he works for the betterment of the class and the college.

We may well boast of the honors we have taken in Class Athletics. In football we have won one of the three championships, in baseball we have won two of the three, and in basketball we have won for three consecutive years.

We have furnished more than our share of monogram men in Varsity Athletics, of whom we are justly proud. In football we have been represented by Cool (Captain), Anthony, Plyler, Morton, and Phillips. In baseball we have had Farmer (twice Captain) and Patton. In basketball we have furnished Chambers (Captain), Austin, and Phillips (twice Captain). Melver, Kephart, Nash, and Potter (Captain) have won honors on the Track Team.

The growth of the college has been as fast as could be expected. There has been an average of one new building a year for the four years we have been in college, and now the erection of a new Mechanical Building is in progress. In the activities of the college such as Y. M. C. A., Literary Societies, Clubs, and the Honor System, the members of our class have taken a very important part. We must not forget the many who have worked during spare time to pay or help pay their expenses.

We have fought hard for the battle we have won. We are heroes in this small portion of our life's work. May we prove as successful hereafter.

HISTORIAN.

Somehow, Somewhere, Some Day—

Bill Little will light that cigar.
Prof. Browne will treat himself to a nice, new hat.
Plyler will learn something about Mechanics.
Pretty Gill will be able to persuade Archie Farmer that he really is a pretty good second baseman.
Dr. Hill will forget that same old joke.
Fonnie—the same.
Henry Nash will proudly don a track monogram.
Prof. McIntyre will get in a hurry.
Archie Farmer will stop talking about that trip to Florida.
Fred Poisson will lose his breath.
Dock Austin will throw a goal in basketball.
Plyler, Leguence, and Henry Burleson will graduate.
Emery Rouse will stay away from town.
Brickhouse will lose a pound of flesh.
Henry Phillips—ditto.
Enos Blair will learn how to carry his saber.
Archie Farmer will tell the truth.
Bullard will cut a Y. M. C. A. meeting.
Oss Anthony will find out who moved his trunk down to Hillsboro Street.
Lacy Coble will get well of the boils.
Perch Wrenn will collect a Book Store bill.
Nat Lachicotte will spend a night on the campus.
Keith Keller will stop talking about Mexico.
Paul King's feet will get well.
Dug Leard will miss his nightly game of chess.
Squire McDearman will develop into a pitcher.
E. B. Nichols will get the fountain on the campus.
Zeb Taylor will take up the study of medicine.
Bill Shaw will get his love affairs straightened out.
Archie Doolittle will fail to make the honor roll.
Tracy Porter will put away childish things and reach a man's estate.
Victor Breeze will proudly claim his "Heart's Desire."
Ben Foster's corns will allow him to develop into a pitcher.
Slats Griffin will grow fat.
Mabel Houck will own an automobile.
Frank Huette will return some borrowed property.

Eddie Weatherspoon will add a cubit to his stature.
Wigg Watts will learn the golden value of silence.
Jack Rees will make love to Prof. Vaughan.
Sunday School Roberts will stay away from church.
McPhail will stop talking through his nose.
Dear William Thorp will learn how to read notices in the Mess Hall so they can
be understood.
Red Ross will lose his pipe.
Monk Jones will break into society.
Prof. Camp will receive "undivided attention" on Economics class.
Dr. Harrison will forget to be concise and clear cut.
Henry Phillips will be able to tell something really worth while in less than two-
hours' conversation.
Rastus Bailey will stop chewing the weed.
Prof. Riddick will button up his vest and take down the railroad crossing sign.
M. R. Quinerly will become a naughty little boy.
W. O. Potter will be exempted from one of Prof. Vaughan's exams.
Lacy John will forget his boasted authority.
Fred Davidson will pass Freshman Algebra.
Edgar McNeely will stop going to the Grand.
Warren Moody will stop dancing.
Bill Lewis will stop blowing the cornet at night.
Fetzer will learn how to dance.
F. E. Patton will become accustomed to the giddy delights of city life.
Guy Monroe will go to chapel.
Prof. Clay will give a sensible answer to a question.
Fontaine will learn how to write on a "stenographer."
Prof. Ellis will forget his slide rule and be a visitor on class.
"P. G." Owen will believe something we tell him.
Jim Townsend will get a cap large enough for him.
Will Patton will stop throwing bread in the mess hall.
Prof. Poole will be able to do without his note books.
Pluto Johnston will stay off of Fayetteville Street for a whole day.
Doc Hurtt will stop promoting graft schemes.
Hop Jewell will be an astronomer.
Runt Liverman will stop saying, "Gol-durn it."
John Harvey will be seen without his glad rags on.
Georgia Roberts will be persuaded that he really cannot sing.
Jackie Cox will stop rolling garbage cans down the steps of Watauga Hall.
Mike Michaels will become a famous musician.
Jeff Phillips will become ambitious.

Hugh Bailey will ram a man for missing nine o'clock inspection.
W. G. Caldwell will grow some hair on his glassy pate.
Commodore Perry will wipe off that sunny smile.
Bayne will write a story and leave out the mush.
R. O. Caldwell will be an athlete.
Possum Vann will quit eating apple pie.
Buchanan will stop breaking the ladies' hearts.
Tommie Nicholls will miss a night at Saint Mary's.
Frank Morton will stay awake through a whole one-hour class.
John Schenck will get an ad.
Henry Burleson will be late for a meal.
D. David Cox will get a sponsor.
Credle will tell a joke.
Fontaine will fall in love.
Roscoe Frank will break a date.
Alphabet Geitner will lose his leg on Prof. B. Moore Parker.
Slip-stick Smith will stop talking about his job last summer.
Possum Vann will be on time for Prof. Browne's class.
Buck Buchanan will learn the name of that Freshman that has been dodging
him.
Cupid Craig will get drunk.

Senior Class Prophecy

Some folks have high ambitions, some have higher, and some have none. Mine never went so high as to be President of these United States, because I had sense enough to realize that I had no chance. My mother told me when I was a small fellow that she thought my chances were good, but once when I was longing for a good puff of Duke's Mixture tobacco, I traded my chance for said package, and the thoughts of ever holding that great position were forgotten.

I think every fellow has something he hopes to realize some day, and he works with that in view. Mine was a little cottage, plain and simple, nestling at the foot of the Blue Ridge Mountains where I could see its great peaks swelling against the western sky, and as a chief ornament for this cottage—my wife.

This, whatever it was, had been realized, and as we sat together one afternoon, the latter part of May, 1934, my thoughts turned to old A & M and the many friends I had made during my four years' stay there. During my twenty years that had passed since I stood with my classmates in old Pullen Hall, now torn down and replaced by a larger and more modern building where Aviation Engineering is now being taught, I had never made friends that were closer to me than those fellows that stood with me trembling, and with tear drops in their eyes, to receive their sheep skins that they had so faithfully striven for.

I had never forgotten them, and I asked my wife if she would help me write the whole bunch and find out what each was doing and how well they had succeeded. She consented, and for several afternoons, after I had finished my day's work, we wrote letters. They all answered, and to you I will tell their stories just as they were written to me.

DEAR AUC : Twenty years is a long time, but Old Fellow, I could have done worse. Snow Hill was mighty lonesome to me, but I liked the place so I figured that it would be much cheaper for me to bring the attraction to Snow Hill than to go to Raleigh so often. So I married the girl. I tried Civil for awhile, but soon got tired of working, as I was always fond of sleep. The town has grown and we are now able to bathe in a sure enough bath tub. In fact I am as well fixed as a man stopping at the Bland with a room with a bath.

Yours truly,
SWAMP HARVEY.

DEAR AUC : After holding a job of little consequence in the North, I came back to the Bull City, where we do things. I beat the ring for City Engineer, and am now doing the town for the trouble. I am drawing up my profile and figuring out the cost of bringing the Mississippi River by here, as navigation is all we need to make Durham as large as Little Old New York. My wife is a great help to me, and she is writing this letter to you. I was always strong for stenographers.

Yours truly,

VIC BREEZE.

DEAR AUC : Guess you well remember how we grafted at the Book Store. Well, I found that it was just as easy to graft in larger things, and I am doing it up right. Just finished a large concrete job for the Durham and Slowpoke, and as I got in with the contractor I gave him a few thousand that was not there, and got my half. Am leaving next week for the coast, where I have some drainage to work. I have finished paying all the old Book Store accounts, so you see I am doing well.

Yours truly,

PERCH WRENN.

DEAR AUC : "Bulling" and traveling were always my greatest pastimes. I thought I knew the thing to do, so I hit it out west. Did that country for two years, but found life pretty hard. I bought me a ticket for Mooresville, and here I am, glad to get back and proud as ever of my birthplace. I am in the hardware business but don't work much. Sleeping and joy riding and "beefing" with the boys take most of my time away from my business. I am still a booster of the I. H. C. stuff, and sell some occasionally.

Yours truly,

PLUTO JOHNSTON.

DEAR AUC : We received your letters at the same time, so are answering together. Silver is as good as ever, but not bragging at all, we have pulled the old place out very much. Bought the copper mine, and got down to business. Copper is bringing a good price, and we are able to keep plenty of Chesterfield cigarettes on hand for our friends. We still know how to find the I. H. P. of anything from a steam engine to a wheelbarrow, but have never found out why a gas engine is built on one of three cycles. We still go bear hunting and always get a rabbit or two. Our chief pastime is stuffing the natives, but "Isch Ka Bible."

Yours truly,

SWIG and S. J. Cox.

DEAR AUC : If you are a reader of the *Saturday Morning Gate* and an admirer of true art, you have noticed what I am doing. I found civil very good, but it was too much trouble to carry a step ladder around with me so as to be able to see through the transit, so I gave it up. I took a few weeks in the New York Art School, and then accepted a position with the Curtis Publishing Co. I go around to the Y. M. C. A. often, but am too busy to take an active part.

Yours truly,

CUPID CRAIG.

DEAR AUC : Why work when you can make money easier? I have a dancing class two hours a day, and loaf twenty-two. I have a good class of four hundred girls from all over the South, and could ask for nothing better. I had an offer with the Keith circuit to do fancy dancing, but turned them down as they only offered two hundred per week. I expect to spend the summer at Atlantic City. I wish you could run up. I have been married four times, and am single again.

Yours truly,

SAM-I. JONES.

DEAR AUC : In Kansas, and glad of it. I took a course out here at the University and then bought me a farm. I raised more wheat last year than I was able to reap, so I had to turn it under. I think I will some day return to the Old North State, and show the folks in Rowan how to do things. My Old Woman wants to see the East and she is boss at our house. Am still a lover of Saratoga chips.

Yours truly,

MARCELLUS BAILEY.

DEAR AUS : Speaking of an easy life, and one that is enjoyable, I am leading it. Outside of a few hundred boils and other minor defects I am doing the country for the florists' trade. Perhaps you had noticed that I have discovered a pure black rose, but which has the smell of an onion, this being its only fault. I still enjoy a game of bridge. When in Greensboro come out to see me.

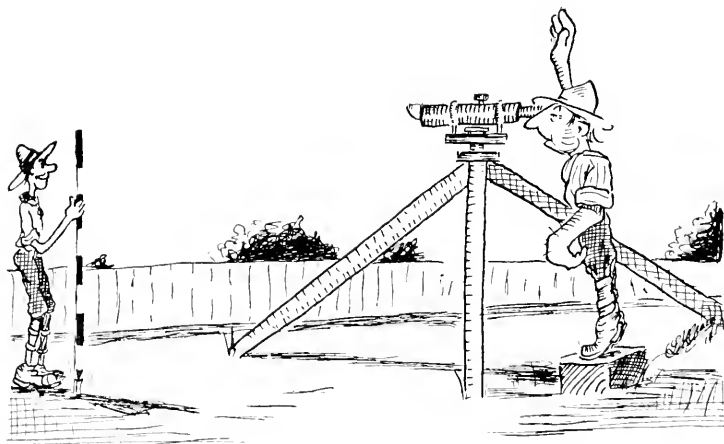

Yours truly,

LACY COBLE.

DEAR AUS : I married a young widow, farm and all, and moved to it at Rabbit Hash, Kentucky. I have discovered a new kind of corn, which, if treated by a certain chemical known only to myself and the dear owner of the farm, precipitates into a fine brand of genuine Kentucky Corn Flakes. This I expect to bring me a fortune, which will go to constructing Y. M. C. A. buildings in small colleges.

Yours truly,

LACY JOHN.

DEAR AUS : Did you think, when I received my skin to be a chemist, that I would ever follow it? No, sir! I had too good a line of bull to tie it up in a laboratory, so I took a job traveling for the Lumina Sardine Company. I worked for them six months and then bought the business. I have lately put me in a bull-frog farm, and find bull-frog shooting great sport. I joined the Benedicts long years ago. As side line I am Consulting Specialist for the American Tobacco Company.

Yours truly,

WINDY POISSON.

DEAR AUS : The Westinghouse Machine Company called me, but not for 17½ cents per hour. I started in the Turbine Department and stuck. I got up a football team, and expect to take them down on Riddick Field next fall. I am Consulting Engineer in the Turbine Department,

and if they don't watch me I will throw the President for his job. I am now working on a gas turbine, and expect to perfect it.

Yours truly,

DOC HUETT.

DEAR AUS : I know we had a hard time while in college trying to run the *Wau Gau Rac*, but I am now applying that little experience to my life work. I tried farming soon after I left college, but couldn't get the proper labor; and I found that I would have to work some myself, so I gave it up. I then went into the poultry business and the hens refused to lay, so it went up. I am now running the sporting page for the *Washington Post*; and not bragging at all, I think it is the best in the city.

Yours truly,

DRUNK NASH.

DEAR AUS : After an arduous struggle to attain merits as a railroad engineer I have at last succeeded. I am now running the Submarine Limited, which runs between New York and Liverpool. These engines are gas burners, and on the trial trip last week I made the trip in twelve hours, which is very good considering that the tubes have only been in two months.

Yours truly,

FRANK HUETTE.

DEAR AUS : Portsmouth, the pride of Virginia, and the place where I was born, was too good a place to leave, so I opened up an office here as Consulting Engineer. I have a good business, but would do more if I could get to the office on time. I am sleeping eighteen hours a day, and when cold weather comes I expect to do one better. I still enjoy reading my Power Plants and find lots of pleasure in working out theoretical formulae of all kinds.

Yours truly,

JEFF PHILLIPS.

DEAR AUS : I lay all my success to the one fact that I was never afraid of work. I have established a boat factory on Bogue Sound, and do some motor boat repairing. I have never yet found out why Math. was invented or Mechanics is taught to Engineering students. Still train my physique by running up and down the beach for a mile or so every morning.

Yours truly,

W. O. POTTER.

DEAR AUS : If I could have gotten you on the 'phone I could have answered that way, but that would have cost fifteen cents; instead I am getting this to you for two. As President of Lawndale Railroad and Industrial Company, I am happy, and this year I am going to declare a dividend. I have changed to broad gage and this has given me more business at less expense. We now run two trains a day to Shelby, and only last week we hauled four hundred pounds of freight and ten passengers. As soon as I learn to drive my new Ford I am going to bring the Old Woman and some of the children down.

Yours truly,

SHEEP SCHENCK.

DEAR AUS : My nature is as complacent as ever, and the only thing that ever disturbs me is, "Papa, come to dinner." My greatest pleasure is farming, and to stand out on the front porch of my home and gaze across the fields of growing corn brings peace to my heart. But as I sit and smoke my pipe on winter evenings I often think of the more stirring scenes of my youth, as on the gridiron, "A & M's ball, fourth down, three yards to go."

Yours truly,

BALDY CALDWELL.

DEAR AUS : "The Edisonan Fontaine Company" is the inscription which the shingle in front of my office bears. I have been in New York for the past ten years and am working hard trying to get the country to try out my latest wireless telephone. I was married several years ago to a woman who knew Economics equally as well as Prof. Camp. I am still a lover of Calculus and Burly Cubs.

Yours truly,

J. FONTAINE.

DEAR AUS : Somehow the call of electricity did not appeal to me as does easier work, so I opened an insurance office at Hamlet. I have met with great success. I have also opened up a vaudeville house and handle a good line of shows. The "Chicks" all love their manager, and admire his pretty locks. Am thinking of running for Mayor on the wet ticket.

Yours truly,

PRETTY GILL.

DEAR AUS : When I left the old school I really thought that every man in the Ford Shops received over five dollars a day, even the janitors; but after arriving on the scene I realized that somebody lied. I have been with the Ford people ever since I graduated, and have done as well as I could expect. I have just completed a book entitled, "Information of All Kinds on All Lines" price ten cents.

Yours truly,

MABEL HOUCK.

DEAR AUS : Perhaps you would never have expected it, but I am now and have been for some time The Reverend Doctor Woodlin Grady Credle. I have a fine flock and enjoy going around taking meals with them. I have eaten more chicken for Sunday dinners than Hurley ever bought. Swamp Quarter is not as far behind the other world as it could be, and at times I show them how to farm.

Yours truly,

W. G. CREDLE.

DEAR AUS : Teaching these heathen Y. M. C. A. work is about as hard as trying to make Prof. Vaughan think you know something about Power Plants, but I find it is great stuff. This makes my tenth year in the Philippines. I spent the previous time trying to make up my mind what to do. I try never to let turbines or steam engines enter my mind, as they were what put me where I am.

Yours truly,

BEN FOSTER.

DEAR AUS : Why go in the fields and work when you can sit in the office and make the old kale roll in? Architecture called me and I answered very quickly. I have just completed plans for a new City Hall in Charlotte, my native town, and I hope to clean up on it. Am always busy, and study as hard as ever. I have invented a special footrest that elevates your feet at an obtuse angle. In all I am doing well.

Yours truly,

DICK VON BIERSTEIN.

DEAR AUS : "Men wanted for the United States Army" was the sign I read, and I fell for it. It is great, only I can't get the commanding officer to let me drill the men as much as I want to. I was commissioned a Lieutenant when I entered, and am now Captain of a company at Fort Caswell. I was under Col. W. G. Peace for two years, and he is the same good fellow.

Yours truly,

ENOS BLAIR.

DEAR AUS : The first thing I bought after I received my diploma was a camera that takes, develops, and finishes the photo in one minute. I followed the fairs with it long enough to buy me a moving picture camera, organized a company, took them to Robersonville, and went to work. I still get from twenty to forty letters a day from the ladies, but think I shall close this up by marrying the leading lady of my moving picture company, as she owns a good kodak.

Yours truly,

BUDDIE ROBERSON.

DEAR AUS : As I sit in my office and begin to answer your letter, I can look out on the broad and beautiful campus of Elon College, where I am Head of the Department of Gas Engineering. I found teaching attractive from the beginning, and after applying two years of my service at Sugar Loaf I came here. I am working hard trying to discover why gasoline, taken three times a day, makes a fellow's breath smell like a suit of clothes from a pressing club.

Yours truly,

COMMODORE PERRY.

DEAR AUs : All things have changed since we graduated, but the greatest of these changes has come in Electrical Engineering. The General Electric Co. called me to take a place with them at nine cents an hour. It was hard at first, but the sticker will always win, and I think I have won. I have found several good changes of great consequence in generators and I have realized a good sum from them.

Yours truly,

DOC AUSTIN.

DEAR AUs : At the cross roads in Columbia I spend most of my time telling my friends how to farm, and in a few more years I shall have the whole county thinking and doing as it should be done. I have a store here and farm as a side line, but best of all I am enjoying life. My wife is a good farmer, and that is why I can live so freely.

Yours truly,

BRICKHOUSE.

DEAR AUs : Army life always did appeal to me, and my experience at the Old School gave me a taste of it. I found my way into the army two years after graduation. I have found my electrical training very beneficial in my army life, and have never regretted the days spent at A & M. My greatest pleasure is calling out, "By the numbers, right shoulder arms!" I have a good company and stand in with the men. I had a hard time during the Japanese War, and I can truly say, "War is Hell."

Yours truly,

BUCHANAN.

DEAR AUs : Four hundred bushels of corn on one acre is pretty good, I think, but that is what I raised last year. I have been touring the State at the expense of Uncle Sam, telling them how I did it. I saw lots of old A & M men while en route, and they are all doing well. If my corn crop continues as good as ever, I will have to get up a corn flake company so as to utilize my output.

Yours truly,

HARLEY BULLARD.

DEAR AUs : I have been applying my Civil Engineering knowledge to running a log train from Goldsboro to Selma. This run was given to me because it was short and the officials were afraid to risk my want of sleep any further. My latest book, "Sleep," tells how to sleep by the integral method, and I think it would interest you. I have never been able to figure out why water runs down hill, but it does.

Yours truly,

SLATS GRIFFIN.

DEAR AUs : I have been putting into practice for the past twenty years what I learned in school, and I tell you it pays. All the folks know I am a scientific man, and I set them a good example. With all this good work I don't call it my greatest success, for I have one thing that goes above that—the winning of my Little Country Jane.

Yours truly,

BOB CALDWELL.

DEAR AUs : Living at Richlands, I naturally wanted to hang around there and give that country a fair trial. I soon found out that I could never raise over four bales of cotton to the acre, so I left. I did the West for several years and finally settled in Utah. I have seven wives and a lot of other live stock, and am breeding a variety of disease resisting gophers.

Yours truly,

ROSCOE FRANCK.

DEAR AUs : My first job was erecting a coal chute at Wilmington, "The City by the Sea." This gave me a good start with the Coast Line. I have ceased going to Norfolk as much as of yore, but the Madame goes up occasionally. I have a good quartet here in Wilmington, but am always too busy to sing with them. I have never forgotten the environment necessary for the best growth of gold fish.

Yours truly,

HOP JEWELL.

DEAR AUS : I have excited the whole world by my latest invention, the Phonographic Slide Rule. This rule is very much like the one we used, only it has a phonographic attachment; instead of worrying about how to point off your answer you turn a crank and it is sung to you in a high tenor voice. This, I know, will make me famous.

Yours truly,

SLIDE RULE SMITH.

DEAR AUS : LeGrange now has an electrical plant, and the Superintendent's name is Mister E. P. Rouse. I have all the people letting that wonderful fluid called electricity do their work. No more do we stare into the darkness as we stroll along our one main street, but the lighting system resembles that used at school— one candle power per acre.

Yours truly,

EMERY ROUSE.

DEAR AUS : I guess I must confess to you in a confidential way that I was the dern fellow that put Roxobel on the map. These dern people down here don't know half as dern much as they thought they did, so when I arrived with my long list of knowledge I cut loose, and they dern soon realized that I had the goods. I am County Surveyor and Postmaster at a salary of four hundred per annum. I have a good home and two dern boys, so you can figure the rest.

Yours truly,

LIVERMAN.

DEAR AUS : Knowing nothing better to do after graduation, I left for the West to make my fortune. Taking up a claim of a few hundred acres, I built a cabin and sent back East for The Lady. It was a pretty hard thing to ask her to come to such a wilderness, but I just couldn't live without her, and she said she didn't mind so much as long as she was with old Bill, and so here we are. We are living well with a good ranch, plenty of feed, and a happy family.

Yours truly,

BILL LITTLE.

DEAR AUS : When I finished school my father gave me a good start in Civil Engineering, and I thought I would be satisfied; but I wasn't. One day after I had defeated Method in an exciting game of baseball, one of Connie Mack's scouts walked up and handed me a contract. I couldn't resist so I signed up. I have been in Philly ever since, but Mack now thinks I was built for comfort and not for speed.

Yours truly,

SECURE McDEARMAN.

DEAR AUS : "Go West, young man" was never meant for me. I thought the Old North State was good enough, so back to Mount Olive I came. I have never regretted it, for with my farm and flour mills at the cross roads I am considered a successful farmer. I am also farm demonstrator and am doing great work for this community.

Yours truly,

McPHAIL.

DEAR AUS : The temptation of the lights in old Atlanta was too much to resist, and it was either farm and be away from them or do something else and stay in the city; so I opened up a picture show and it has proven a gold mine. I am still a bachelor and like the idea, for I never could settle down to one. I am still fond of dancing and my "Salome Special" is a dream.

Yours truly,

Pretty ROBERTS.

DEAR AUS : The Veterinary Science is by far the greatest profession that any man can follow. I know, because I spent four years of my precious life learning the stuff. Now Elon College is a good school, and when I came home I found I could get a course put in here. I did, and to-day I am Professor Joseph Edward Michael, D.V.S., and I am graduating scientific "Vegetarians" here by the wholesale.

Yours truly,

J. E. MICHAEL.

DEAR AUC : I am happier to-day over the fact that I quit Mechanical Engineering and took up Textile than ever, for grease wiping could never have appealed to me. I returned to Mooresville and got a job as boss of a broom section. Being a good sweeper, having gained much experience in the 1911 Dormitory, I gradually worked myself up. I am now living a superintendent's life, and am still a good dispenser of the bull, which is very essential to my work.

Yours truly,

Ed McNEELY.

DEAR AUC : The only thing I ever have been lacking in is my figure, but I have made up for it in my other accomplishments. I joined the navy and had a good time spending my fourteen dollars per month. After seeing all the world, including Durham, I returned to Sanford, and have been resting from my hard struggle at sea ever since; but I am living in hopes of landing the job as City Electrician after a few more years of rest.

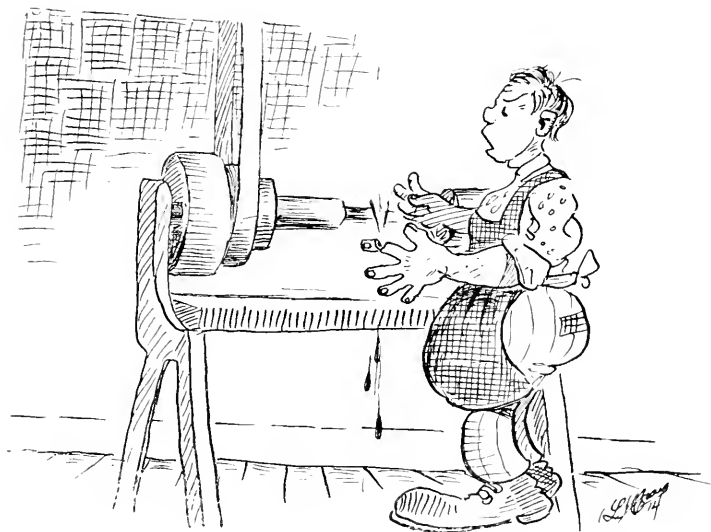

Yours truly,

Eddie WEATHERSPOON.

DEAR AUC : I liked A & M so well that I decided to stay and follow the science of teaching, as I couldn't find a mule small enough for me to plow and I hated the idea of plowing a bull. I am now head of the department and have the fellows just as much afraid of me as ever. I always have a good number of slips for the Registrar when the end of the month comes, but they must work for me.

Yours truly,

M. R. QUINERLY.

DEAR AUC : As chemist for the V. C. C. Co., father of a happy family, and having a wife who can assist me in my singing and dancing, I think I may say I have been successful. I married the day after I graduated, and it was the best thing I could have done as I would have spent all my money going to Atlanta; so you see I began to economize from the start. I haven't missed a dance within a radius of fifty miles in the past twenty years, and enjoy it as much as ever.

Yours truly,

HERR MOODY.

DEAR AUC : Ever since the Junior Banquet I have been a changed man. I am now applying all the finer details of farming to the science of enjoying one's self with the least possible extravagance. My best friends are my dog and my pipe. I have stopped using Duke's Mixture, as I am rid of all the bums who imposed upon me while in college.

Yours truly,

RED ROSS.

DEAR AUC : Have you read my latest book, "Why Young Girls Leave Home"? For fear you haven't I am sending you a copy of it with my best compliments. I hope that you and yours will enjoy it. I always knew that I had a literary inclination, but hated to give up Electrical Engineering; so I flipped a coin to see which I should follow and the literary won. I have been writing some for the *Saturday Evening Post*, which has convinced my friends that I did not follow the wrong road, but I can never forget what the vector diagram is.

Yours truly,

FET.

DEAR AUC : I am still with the Seaboard, and have just finished constructing a line into Mexico City. I call Richmond my home only because I married there, as I am on the road constantly. I often think how I used to slip you a pointer on your Hydraulics, but I hope it didn't hurt either of us. I never worry, no matter what happens; and for my chief amusement I play chess and do some bowling.

Yours truly,

DUG LEARD.

DEAR AUC : Great Falls, South Carolina, has the credit for having the largest power station in the world, and I feel very proud of the fact that I am the big gun on the job. I still miss the Lyric and the Grand, but I am now on a proposition to start a picture show in this town. I have been married twice, and this year, Frank, Jr., entered A & M.

Yours truly,

FRANK MORTON.

DEAR AUC : The game of making a living in this cruel world was too dirty for me, so I decided to stick to teaching, and have been very successful so far; but at times I think of chucking the whole game and entering into Y. M. C. A. work in the foreign fields. I returned last night from the A. S. M. E. meeting which was held in New York, where I read a paper on Foundry.

Yours truly,

PROFESSOR NICHOLS.

DEAR AUC : Plenty of feed in the barns and milk galore! It is selling at a good price, and the folks are not sharp enough to detect the great quantity of water that I put into it. I think I may say that I am on the road to success. The Little Pattons do the milking and I do the delivering with my new Hydroplane.

Yours truly,

F. E. PATTON.

DEAR AUC : Finding Y. M. C. A. work very interesting while in college I decided to stick to it. After spending a goodly portion of my life trying to win the hand of one of the fairer sex I have at last lost all hopes and given up in despair. I have organized a track team here in Manila, and expect to have some good meets.

Yours truly,

D. E. ROBERTS.

DEAR AUS : Raleigh gave me a good taste of city life, and I have always liked it. So, feeling that way, I came to the largest town this country could afford, and here I am. I have always liked New York and the Yankee women are hard to beat. I can't marry for I love them all. I am not a single man because I had to be, but simply because I wanted to be.

Yours truly,

WIG WATTS.

DEAR AUS : New Mexico, the place of a thousand opportunities, is the place I now call my home. I am in charge of some government irrigation work and am a pretty busy man, but I always find time to run up to Frisco. That is some town and their brogue is the best I have ever been able to master. I enjoy stuffing these guys and telling them how easily I mastered the Mexican language.

Yours truly,

MEXICO KELLER.

DEAR AUS : Since my successful year as captain of A & M's baseball team my highest ambition has been to manage a team in the big circuit. My team, the Detroit Sluggers, has started the best season we have ever managed, and we expect to finish at the top. I got my start in the Federal League, but Detroit pulled me away by their good offers. I hit them over the fence occasionally, but am getting too old to hold up the old stride.

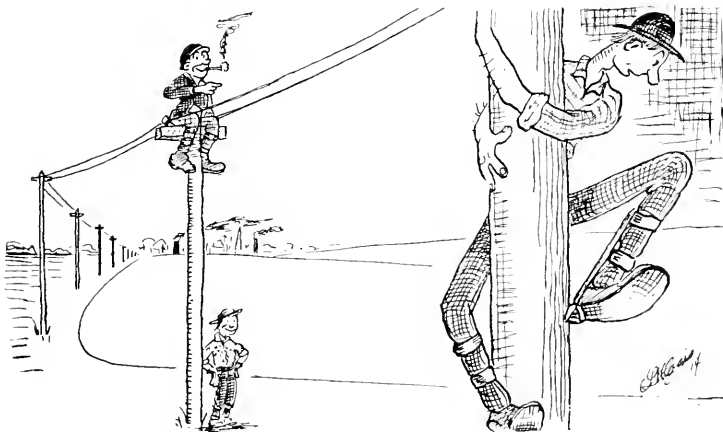

Yours truly,

TY FARMER.

DEAR AUS : My shingle, "T. L. Bayne, Landscape Gardener," made its first appearance at Asheville, but have lately moved to St. Louis, where I have had a broader field to work in. I am kept pretty busy, but never too much so to enjoy a little song. I spend my leisure hours writing poetry for *Munsey's Magazine*, and this helps considerably to buy the baby's shoes. I still get homesick for St. Mary's, but console myself by reading my wife's diploma.

Yours truly,

T. L. BAYNE.

DEAR AUS : My rare experience with the *Red and White* and my grand success at getting subscribers, which was to get their names, send them papers, and collect, gave me the idea that I could succeed as manager of a bigger enterprise. I am now Business Manager of the *Electrical World*, published at Linsdinton, and have met with good results. I write some articles myself on installing high voltage lines. I am also manager of the Y. M. C. A. Basketball team.

Yours truly,

JACK REES.

DEAR AUS : "Patton's Tonsorial Palace" is running night and day, and also running me. As a side line I do some surveying, but only when the weather is ideal. I am also Head Coach of the D. and D. School here, and have put out some fast football and baseball teams. I have made only one mistake since I graduated, and that was that I remained single too long, and now I find that I am too hard to please.

Yours truly,

W. R. PATTON.

DEAR AUS : The greatest disappointment of my life came soon after my graduation, and it has changed my whole career. It is the same old story—a woman who I thought loved me, and I lived only for her. Imagine my consternation when, two weeks after my graduation, I received an invitation to her marriage, and my name did not appear on the card. I bought a small farm out here in Oklahoma, and have never spoken to a woman since.

Yours truly,

T. W. PORTER.

DEAR AUS : I guess I was a natural born teacher and I knew where I was needed most, so I went back to V. P. E. and took charge of their C. E. course. I have gotten it in fine shape, and I can truthfully say that I have put it next to A & M in that line. Last week I was offered the Adjutant Generalship of Virginia, but after considering everything, I decided to stay here and keep up the good work, though it was hard to refuse.

Yours truly,

P. KING.

DEAR AUS : The Piedmont motor truck is the last word in the way of a wagon, and it is hard to supply the demand for them. I thought I would really follow the mill business when I left school, but the hours were too long; so I started in the office here at the wagon factory and stuck. I am still a great admirer of the mountains, and each Sunday finds me on my way to Blowing Rock—but never alone. I put a stop to that two years ago, and she loves her Blondie.

Yours truly,

BLONDIE GEITNER.

DEAR AUS : If any man should hit me, he would hit the best bass singer in the State of North Carolina. The only thing that I ever let interfere with my singing is my business, which only takes a few hours of my time each day, for you know a cotton mill president doesn't do very much. The rest of the time I am indulging, with a few of my friends, in a little close harmony. I am proud to say that I think I have at last fallen in love, and soon I guess you will receive the proper notice to prove same; and don't forget that all presents received must be prepaid.

Yours truly,

BILL SHAW.

DEAR AUS : I have quit all my bad habits and have gone into the clothing business, which has given the country quite a shock. "Monroe's Slit Trousers" are the latest agony, and all the swells in Eagle Springs are falling for them. The farm has gone for the good cause, and I am a much happier man; for my love of the genuine old sleep works very nicely with my business, and I am allowed to partake of it more often.

Yours truly,

T. G. MONROE.

DEAR AUS : My ambitions always centered in the mastering of wireless, and that has been my chief pursuit for the past nineteen years. I have at last succeeded with the wireless control of ships, and will make my first attempt to send one across the ocean next month. The

ladies still worry me, but I can't give them the pleasure of my company as I once did. I am always longing for St. Mary's and that dear old choir practice, but I know they are gone out of my life forever.

Yours truly,

TOMMIE NICHOLLS.

DEAR AUC: I have one thing to regret and that is that I didn't take M.E.; for what good could I get from C.E. when I was putting together a reaper or mowing machine for some old farmer? I went with the I. H. C. Co. and I am their Consulting Engineer in the Construction Department. It is fine work and gives me plenty of chance to concentrate my ever working mind. I am a member of the Chicago Bachelors' Club, and a strong supporter.

Yours truly,

D. W. THORP.

DEAR AUC: I am now drawing a salary from the American Locomotive Works that will, and does support a large family. But as always, the family has its troubles. I am trapping in the Richmond Symphony Orchestra, and as a side line I raise poodle dogs, my favorite beasts. I have charge of the Electrical Locomotive Department, which has become our greatest work, and have given out some valuable information to the magazines. So you see I am somewhat of a Jack-at-all-trades.

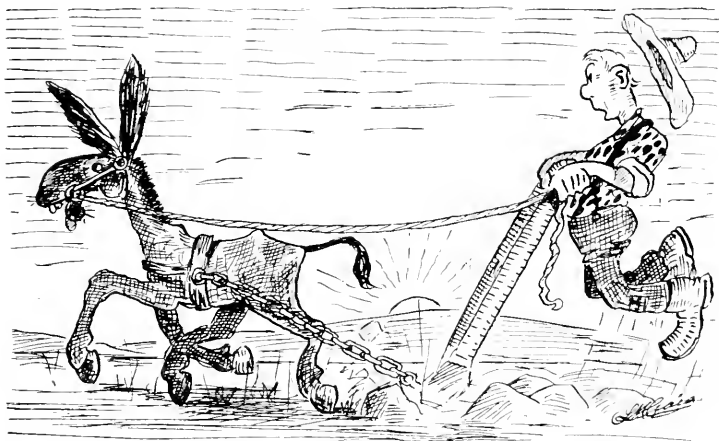

Yours truly,

ZEB TAYLOR.

DEAR AUC: Living is hard enough to do, and it takes more energy than I like to dispose of; but breathing is most too much, and at times I get so tired of it I feel that I will quit the whole thing. My first job was chief pole climber for the Southern Power Company, and I liked it for a while. But after a time, I got tired and informed the boss that if he wanted me to continue my services he must give me a portable elevator; and when he refused I quit. I am now farming, and after all that is the best life to lead.

Yours truly,

P. PLYLER.

DEAR GUS : Not being an ardent admirer of Cole Bease, I thought I had best stay away from my old town. So the day I got my dip, I pawned my overcoat and bought a ticket to California. To-day I have more orange groves than the Yarrowbrough hotel has loafers. I am loving at the rate of four per week, which is my record so far.

Yours truly,
NAT LACHICOTTE.

DEAR AUS : You would not have thought that after having taken an Agricultural Course at A & M, I would have become an instructor in Mathematics; but having specialized in that subject for four years at the old place I became very much interested, and am now Professor of Agricultural Mathematics at the Swannanoa Agricultural College. I have been married seventeen years and have a son who will enter West Point next year.

Yours truly,
FRED DAVIDSON.

DEAR AUS : On my return to my native county I set things going and they have never ceased. I have declined the sheriff's office three times, as I find more pleasure in devoting my whole time to the production of strawberries. Life in the City of Chadbourne is all to the good. I have charge of the farm demonstration work, and you should see me flirting with the farmers' wives. I have continued the *Hau Gau Rac* and enjoy it as much as ever.

Yours truly,
RASTUS BAILEY.

DEAR AUS : As City Engineer of Greensboro I am happy. I am still a bachelor, but if the Woman's Club continues the increase of tax for us I fear I will have to join the Benedicts in self-defense. I go down to the Club every night and enjoy a little game. You see leading an easy life is my hobby. I haven't missed a musical comedy since I graduated, and don't expect to as long as I have the price of a rush ticket in my pocket.

Yours truly,
JIM TOWNSEND.

DEAR AUS : Dixie Land would have suited me fine to locate in, but I just couldn't get the madame to see it that way; so back to Jersey City I went. A man is never so satisfied as where his home is, and then, too, the girl made a big difference. I went in with my father and somehow we made a great success from the start. I have kept up my good work as far as studying goes, for each night I have tried to learn a little more.

Yours truly,
ARCHIE DOOLITTLE.

DEAR AUS : The leader of Alexander's Rag Time Band was never in it compared to me. I have assembled some aggregation in this old town of Gastonia, and our Sunday afternoon concerts are meeting with great success. I have composed several pieces myself, among them "The A & M Cadet March," which has given me a good name with the greater musicians.

Yours truly,
BILL LEWIS.

DEAR AUS : I have built the greatest studio south of Washington in Asheville, and when it comes to art and high class kodak work I am the man on the job. My electrical training has given me some great ideas, and I have gotten out some improvements in the printing line. My wife is an artist of the finest class. She is also a suffragette, which makes my life a little harder.

Yours truly,
HENRY BURLINSON.

DEAR AUS : On account of my good work at A & M the Southern Express Company gave me a good position, and after running as messenger for four years I was given the office at Method. My greatest asset is my wife, who has gained a reputation of being the best pie maker in Wake County. I always take a day off and go to the State Fair, which brings back memories of days gone by when I was some flirt.

Yours truly,
POSSUM VANN.

DEAR AUS : I once thought that with a little training I could become the White Hope, but after training for six months I found that I had only lost four pounds; so I gave up the idea and have at last come to the conclusion that nobody loves a fat man. I thought I would join the army and went to the recruiting station, but didn't think I would like the early hours so I am now on the farm. I am doing very nicely. I have never married and never expect to.

Yours truly,

H. M. PHILLIPS.

Here's to the eighty, all tried and true,

The largest yet that ever got thru.

May they all do what I have prophesied,

And their names will live, long after they have died.

GRAHAM H. ANTHONY, *Prophet*.

Last Will and Testament of the Class of 1914

OFFICE OF KETCHUM & CREATHAM

STATE OF INDEFINITE HARDSHIPS {
COUNTY OF WIDE-A-WAKE { VILLAGE OF THE SINKING SUN

To whom it may concern—Salutations :

Know all men by these presents, that we, the undersigned, known officially as the Class of 1914 of the North Carolina College of Agriculture and Mechanic Arts, realizing the uncertainties of life and the vicissitudes of fortune, and being about to depart from this state of continual turmoil for regions unknown, and being collectively and individually of sound mind and judicial temperament, do hereby declare the parties and organizations hereinafter named to be our true and lawful heirs, and to give and bequeath to them the following named articles and properties, to-wit :

SECTION 1

Article 1. To the Class of 1915 we do give the absolute rule of that tract of land known as the A & M College campus, with all rights and appurtenances pertaining thereto; said tract of land lying and being situated in the village of West Raleigh, and more particularly described as follows: Bounded on the north by Dr. Hill, on the east by Dr. Harrison, on the south by nothing, and on the west by all Agriculture.

Article 2. We do also give unto the Class of 1915 the inestimable privilege of smoking cigarettes with impunity in Charlie Jones' lunch room without being ever on the lookout for "some damn Senior."

Article 3. We do also give unto the aforesaid Class the enjoyable right of going up town whenever they please and staying as long as they please.

Article 4. We do also grant unto them the authority to report and "ram" all underclassmen for each and any breach of college rules that may come under their observation.

Article 5. We do also grant them license to elect members to Congress and to pass bills without fear of molestation at any and all hours of the day and night.

Article 6. We do very unwillingly and not of our own accord bequeath unto the aforesaid class those unfortunates whose engines held insufficient fuel to carry them safely through the gantlet of Senior exams. May the said delinquents be unto the aforementioned class the true friends and companions they have been to us, and may they never again put the college in a "precarious condition" by their sad habit of flunking.

SECTION II

Article 1. To our dearly beloved president, we beg to tender at this late date, all the "rams" which we have neglected to turn in heretofore on account of a naturally procrastinating temperament. May he lose no time in punishing the miscreants as they deserve.

Article 2. We do also bequeath to the aforementioned despot, the Class of 1915 to use as he sees fit in preserving the honor and dignity of this our beloved college and in the furthering and carrying out of his edicts.

SECTION III

Article 1. To our respected and beloved Dean, our faithful guide through the wilds of the English Language, we do bequeath and make him sole heir to all books and manuscripts pertaining to this course. And with these, by these and through these, may he be encouraged to do much "parallel reading."

Article 2. We do also bequeath unto him many quiet and unmolested hours of enjoyment, during the summer months, of his favorite characters, Robin Hood, Little John, Beowulf and Robinson Crusoe.

SECTION IV

Article 1. To Professor Browne, head of our Electrical Engineering Department, we do give and bequeath and make him sole heir unto the full and entire enjoyment of fifty-four (54) hours of hard labor each and every week (of six working days).

SECTION V

Article 1. Realizing his full and just appreciation of the below mentioned commodity we do will unto our respected Commandant, Lieutenant Horace F. Spurgin, all the punch to be made and used at future Senior dances.

SECTION VI

Article 1. To our Registrar, Mr. E. B. Owen, better known as "P. G.," we grant the supreme pleasure of adding to his conduct book the names of the incom-

ing class of 1918; and we request that he destroy those leaves which contain a record of our misdeeds while we were under his careful and strict guidance.

SECTION VII

Article 1. To Professor Riddick, better known as "Sorrell Top," we do tender all athletes entering with the yet unborn class of 1918. May they all come within the eligibility rules of our sister institution.

SECTION VIII

Article 1. To our College Mater, Mrs. Harris, we give our most sincere and heartfelt thanks for the tender care she has given this class during its four years in college. May all entrants to this institution be as appreciative of her motherly care as we are.

SECTION IX

Article 1. To the college Dining Hall, better known as "Hurley's Hash Foundry," we bequeath all students who are green enough to submit to the monthly separation from their monthly exchequers the sum of eleven dollars, for which they receive nothing in return.

SECTION X

Article 1. To the divers and sundry coaches of college athletics we do leave all those aspirants for varsity positions who have as yet been so unfortunate as not to have attained the coveted berths.

SECTION XI

Article 1. To each and every member of the embryonic class of 1918, we do give the invaluable "privileges of the college" as mentioned on the reverse side of their registration cards. Having striven vainly for four years to find out what these privileges are, we turn the problem over to them.

SECTION XII

Article 1. In conclusion, as we are now about to depart from these hallowed precincts, and leave behind us our many dear friends, we hope that some day we may all return and find the glad hand awaiting us.

(Signed) THE CLASS OF 1914.

Sworn to and subscribed before me this the first day of March, 1914. Witness my hand and Notarial Seal.

(Seal)

(Signed) P. G. ALLEN,
Notary Public.

Juniors

The Black and Gold

Come fill the glass
As full as it can hold,
And drink to the class
Of the Black and the Gold !

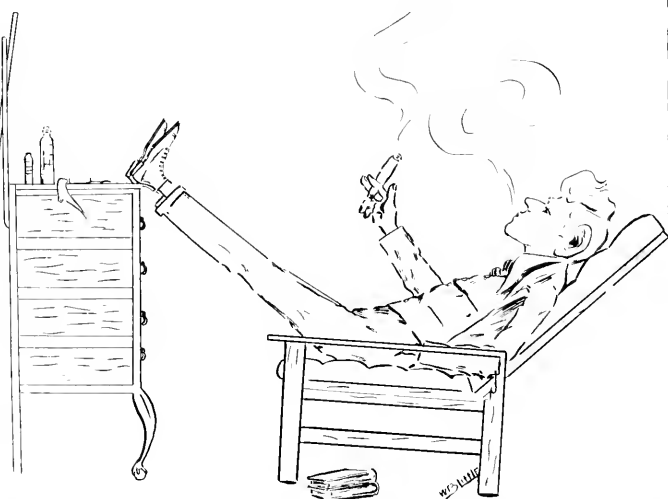

Here's to the past years—
Freshman and Sophomore;
To those homesick tears—
But we came off conqueror.

Then for the present, lads,
Fill a full stein;
Drink health to the Juniors
In the reddest of wine.

The class of fifteen,
That knows no peer;
Hurrah for A & M Juniors!
We're glad we're here.

POET.

Junior Class History

On the fifth day of September, A. D. 1913, a very important event took place in the history of our college. The members of the Class of 1915 began their careers as Juniors. The Class of 1915, it is true, had lost several men who, much to their own regret but at the earnest solicitation of the Dean, agreed to register as members of 1916. But their places were taken if not filled by an equal number of the men of 1914 who decided to defer their graduation in order to have the honor of membership in our distinguished class. We were about seventy-five strong, this being slightly less than half the number with which we entered as Freshmen.

Having lost the greenness of Freshmen and the conceit of Sophomores, we began our work in earnest. The first few days were spent in getting acquainted again, and in watching the awkwardness of the Freshmen.

The new class officers took up their duties immediately upon their arrival on the campus. Meetings were called, and various topics were discussed, such as class rings, banquet, and football. The prospects for a good class football team did not seem very bright at first, but later more interest was shown. The result was two decisive victories over the other teams. We won from the Sophomores by a narrow margin, but we piled up an overwhelming score against the Freshmen. This gave us the class championship for the first time. D. T. Dailey had the honor of being our captain.

Previous to this event we had always put out good class teams, but never were quite successful. In baseball last spring the 1915 team was defeated in the game for the class championship by a close score.

Our class has never been represented on the 'Varsity Football Team by a regular man, although it has furnished some good subs. We have been represented in 'Varsity Basketball and Track each year since we entered college, but did not succeed until our Sophomore year in placing a man on the 'Varsity Baseball Team.

Our studious habits were somewhat interrupted by Fair Week and Thanksgiving, but everything was straightened out by the December finals. However, due to various reasons, our membership was slightly decreased after the Christmas holidays.

We are now looking forward to the spring season of baseball, and then commencement. We hope every member will have good luck from now on and be back next fall as dignified Seniors to be graduated with honors.

HISTORIAN.

Sophomores

Metamorphosis of a Freshman

When the noble class of sixteen
First met in our classic hall,
We were green as are persimmons
When the plums begin to fall.
We were green: Yes, I'll admit it;
We were fresh: Yes, that is true;
But we learned to carry water
As all Freshmen have to do.

And in this way we started
On our humble Freshman year;
And each night we watched and waited
With trembling dread and fear,
Until we saw on rising
The first dim light of dawn.
And as we dressed, thanked our kind fate
That the long dark night was gone.

But now we of the sixteen bunch
Are mighty SOPHS at last;
We call the new men FRESHMEN,
And we say they're green as grass;
But in our hearts we love them,
That noble Freshman crew!
And whom we love we chasten
As the Bible tells us to.

Sophomore Class History

On the seventh of September, 1912, the Sophomore Class made its debut at A & M, with an enrollment of two hundred and twenty-five members. We came, just like all new men, green but willing to take the chance. We invested our money in all the harmless tricks that are generated by the upper classmen, and generously contributed to the radiator, bath, and butter check funds, being often compelled to send distress signals home to our parents. But as Fate would have it we emerged from the nine months' session in perfect health and completely burdened down with the many wise things that are known in college life.

Last September we came back one hundred and fifteen strong and not as the green and frivolous Freshmen of the previous year, but as proud and haughty Sophomores. We immediately took possession of everything, and did considerable advertising by painting our numerals on every available public view. While this was being done others of our crew who had risen to the military rank of wearing two golden strips upon their sleeves were busily engaged in instructing our beloved Freshmen the various details of military contortionism.

Then came new studies that caused considerable boning and a period of peace and solitude, only to be broken one morning when the news was spread that Pullen Hall had been converted into a Metropolitan Zoo. During the drowsy hours of the night a big black bear had taken refuge in the chapel, and was seen serenely reposing in the sun next morning. This, of course, was credited to the keen wits of some Sophomores, but we are readily willing to share the honor with other classmen who ably assisted in this feat. As time rolled on various stunts were pulled off, but a general summary of the remaining time points to a period of unseen activities that have not been duly recorded.

Our class has been well represented on all Varsity teams. In football we have five monogram men: Winston, McHenry, Seifert, Anthony, and Cook. In baseball we have four: Kincaid, Britton, Winston, and Russell. In track we have three: Milwee, Abernethy, and Hine. In basketball Mason is our only Varsity representative. All of these men are classed among the best on their respective teams.

In class athletics we have put out strong teams that have made good records. This year the football team went to New Bern and played the Ghent Athletic Association, defeating them by a score of 14 to 0. Last year we lost to the Juniors 7 to 0, and the same ill luck overtook us this year when we were defeated 7 to 3 on a freak touchdown. Last year we captured the baseball trophy by defeating the Short Course Team 4 to 1 and the Sophomores 8 to 4. Our prospects for another successful year are bright, as the same aggregation that represented us last year are all back in school. On the track we won the interclass meet, which was held for the first time this year.

The following officers represented the class this year: H. E. Winston, President; R. B. Wheatley, Vice-President; S. C. Crater, Secretary; T. L. Milwee, Treasurer; W. C. Albright, Historian, and J. L. B. Jenkins, Poet. Football Team: G. H. Webb, Manager; and W. C. Albright, Captain. Track Team: T. L. Milwee, Captain. Basketball Team: T. L. Milwee, Manager, and W. F. Morrison, Captain. Baseball Team: W. C. Albright, Manager, and R. H. Hodges, Captain.

HISTORIAN.

Freshmen

Freshman Class Poem

I

We are Freshmen, fresh and green
As Freshmen always are.
We are gathered here to seek and find,
From firesides near and far.

II

We are longing for the day
When we'll be "Sophs.," serene;
And lay aside the name of "Fresh"
And lose our coats of green.

III

We've about got used to chewing bull
And answering class reports.
The country look is wearing off;
We'll soon be college sports.

IV

We've learned about the molecules
And the fifteenth power of y.
And all about the seeds and sprouts
And why a tree will die.

V

When we have finished college
In nineteen-seventeen,
We'll look with joy upon the days
When we were fresh and green.

History of the Freshman Class

We arrived on September 3, 1913, two hundred and forty-six in number. When we stepped off the train and walked through the depot we heard voices saying, "I bet he is a Freshman." Under such scrutiny we felt very small and insignificant.

The first night in college was spent in fear behind locked doors and barred windows. The next day was registration day. After we had gone to the Agricultural Building and the Engineering Building to register, we finally found the Main Building and were separated from our money. The rest of the day was spent in looking at points of interest about the campus.

That night some of us that could see into the future knew that cold weather was coming, and purchased radiators from the upper classmen to keep our rooms warm.

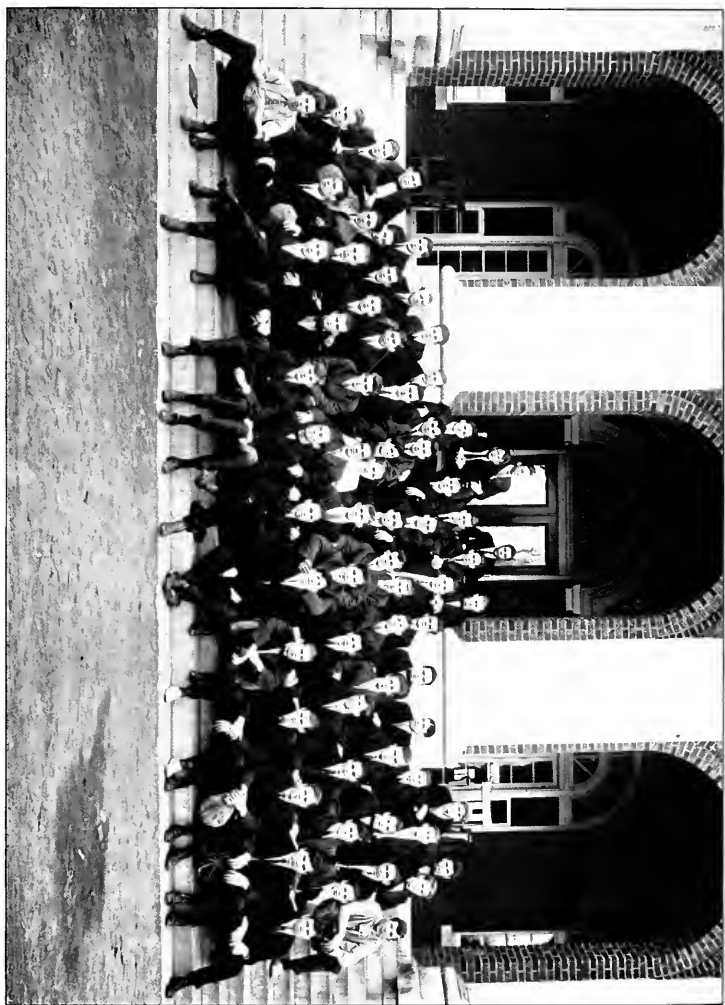

With the aid of the Seniors we were soon organized and had elected class officers. Up to this date they have served faithfully and deserve credit for their good work.

We were much relieved when we found that the "Sophs." had resolved to do no hazing. We have always received as good treatment from the upper classmen as Freshmen ever received anywhere.

We have furnished a lot of good athletic material, being represented on the Varsity football squad by six good athletes. We have also furnished several good men for the scrubs. We prefer not to go into details in regard to our class football game, so we will simply state that the Juniors beat us forty-four to nothing. We expect to do better in baseball, basketball and track.

Two hundred and forty-three of us registered after Christmas, and we have settled down to work again. Although there is still much room for improvement, much of our freshness and greenness has worn off and we are living in hopes of being "Sophs." next year.

HISTORIAN.

The Battalion

To appreciate the efficient work of the Military Department we need only watch the timid, stoopshouldered Freshman develop into a bold and sturdy Senior, and observe the changes that take place in his life as he passes from the obeying private to a position of command and responsibility. The physical exercise and the disciplinary training together help develop in the men an attitude of self-reliance which aids them materially in after life.

Last summer our former Commandant, Captain W. G. Peace, was transferred to Fort Caswell, and Lieutenant H. F. Spurgin was assigned to this position. While we hated very much to lose Captain Peace, we feel very fortunate indeed in having the services of Lieutenant Spurgin, and he has won the highest respect of the faculty and of the students.

On account of the increased number of cadets it was found necessary to add another company, making seven in all. During the first month the new men demanded most attention and drill was held five times per week. At the end of this time they manifested a sufficient preliminary knowledge of tactics and the number of drill periods was reduced to three per week.

During the remainder of the first term the men were given instructions in calisthenic exercises, bayonet exercises, aiming and sighting, and target and gallery practice. On the last regular drill day a competitive drill was held. The pennant was awarded to Company D, commanded by W. T. Shaw. Second and third honors, respectively, went to Company C, commanded by W. H. Smith, and Company A, by D. D. Cox.

After Christmas both close and extended order drills were held. Practice was given in forming advance guards, establishing outposts, and marches. Attacks and defenses were made and general instructions in field work given. This, supplemented by Company and Battalion drill, continued until the annual inspection in April, after which all drill was suspended.

A Record of Athletics During the Year 1913

We like to think, here at A & M, that our college is constantly advancing from year to year in all of its various branches. In athletics during the past year we see certain signs of advancement towards the goal we have set for ourselves; that goal being the athletic supremacy of the South.

During the baby days of the year, our basketball team did not wholly live up to expectations. There was a lack of interest in the sport which was largely instrumental in making us lose the games we did. We are proud of the team, however, for although they lost some games, they lost gamely, fighting to the end; and when a game was over they had no excuses to make. If we are to lose, let us lose in that way!

The baseball team of 1913 was one of which we may well be proud. For the first time in seven years the University of North Carolina was played. It was a thrilling game from Farmer's home run in the first inning to the batting rally in the last of the ninth, which won the game, by the score of 7 to 6. Amherst, Wake Forest, Pennsylvania State, Washington and Lee, and Trinity were all beaten. Others were played and defeated; some played us and won. But because the team won the large majority of its games, and because it humbled Carolina, we are justly proud of it. The pitching of Russell, Kincaid, and Jaynes, the batting of Brittain, Captain Farmer, and Correll, the fielding of the whole team, justify our pride in it.

Of the track team little need be said. Hurtt, Nicholls, Smith, and Captain Floyd were the principal point gainers and stars. The team was not very good, and it was not very bad. But considering the fact that very little interest has been taken in this branch of athletics here, the showing was remarkable.

Our football team won the South Atlantic Championship, and because the teams farther south showed themselves inferior to those in this section, we can justly lay claim to the Championship of the Entire South. In thinking of the team it is impossible to consider it alone, without its coaches. We have lost the services of Eddie Greene, and in retrospect we marvel at the wonders he has accomplished since he first came here. Without a doubt, his football knowledge is not equaled in the south, and scarcely in the country. There are men who have larger reputations as football coaches, but few of them know more football than does Greene. Along with him comes Hegarty. Those of us who have played under him fully realize his value as a coach. His power lies in the control

he has over the squad. There was not a man on it but would work harder at his slightest wish, or punish himself to please him. With him as Head Coach next year, great things may well be expected.

The team coached by these two men was one of stars. It is hard to pick out any one man who surpassed the others during the season. They all played, each and every man, hard, aggressive, and clean football. It was a team of enormous latent strength. When occasion demanded every man on the team became a star, ready to put forth his best for his college. A good many teams got within our twenty-yard line, but not a team had strength enough to rush the ball across our goal.

Captain Hurtt deserves a great deal of praise for his untiring efforts for the team. He was constantly thinking, planning, and working for it, and the fact that we had a successful season is largely due to him. If we tried to name the stars in the backfield we should have to name Sullivan, Riddick, Van Brocklin, and Scarry; if we attempted to name the star linemen, we should have to name every man who played a line position in our major games.

It is scarcely necessary to mention the games we won. How Georgetown, under her valiant captain, suffered defeat at our hands, 12 to 0, is now history. Washington and Lee had us beaten 40 to 0 before the game, but wore crepe the day after, for with that game her aspirations to the South Atlantic title died. We won the Championship and we earned it.

All in all, the season of 1913 was a successful one. Every one of our teams acquitted itself as a team wearing the Red and White should. They all brought honor to our college, not only because they knew how to win, but because they knew how to lose as well. Well may North Carolina and those who love our Alma Mater look upon our record for the year of 1913 with pride.

PARKER G. TENNEY.

SOUTH ATLANTIC CHAMPIONS

DAVIDSON EASY PREY

A. & M. Had Little Trouble With Presbyterians — Second String Mob Sent in—Red and White Played Good Game.

The Presbyterian team from Davidson went down in defeat Saturday afternoon before the powerful machine of the Red and White. The line of the Red and White made their only score in the first quarter when they scored in the first quarter when they recovered a fumble by Tenney at the 10 yard line. The line recovered a fumble by Tenney at the 10 yard line. The line recovered a fumble by Tenney at the 10 yard line.

RED AND WHITE CROSSES WASHINGTON AND LEE'S GOAL

A. & M. Wins Brilliant Victory Over Generals—White & Blue Outclass Throughout Game—Every Player on Red & White Team Stars.

In publishing the account of the football game played in the city this year, which was won by the best team in the South, we think could be more in keeping with tradition to publish the best story of a game obtainable which we in this case the story of the

from the grandstand, where the student body of the North Carolina school. Foster snapped the Van Broklyn passed it to Tenney, the 150-pound full back charged to the General's line. Washington and Lee could not withstand the charge. The line wilted and

TECHS. DEFEAT DOCTORS

Close Game—Medford Put Up Strong Fight—Mouthy Field Handicapped by a Virginian.

After several days of rain, and a stormy day last morning last Saturday, Old Sooner made his first appearance of the day about an hour before the football game with the Virginia Medical College began. The field was very muddy and slippery, which handicapped both sides materially, and prevented much fast or brilliant work.

The game opened with A. & M. kicking to the visitors 15-yard line. Two unsuccessful attempts to gain the 10-yard line. The 10-yard line was recovered it, Van Broklyn after two unsuccessful attempts at the strong Medical line. Five yards on the first down. On the second

A touchdown. Hurtt kicked goal, which is over A. & M. 13.

RED AND WHITE LOST FIRST GAME

Cadets From V. M. I. Defeated Crippled Tech Eleven, 14 to 7 Y. Punting Feature.

With a badly crippled team, A. & M. lost to V. M. I. on Saturday by 14 to 7. The game was a punting feature.

RED & WHITE SWAMP SAILORS

Techs. Make Swampy Showings in First Game of Season—North Carolina Outclassed by Red and White.

A. & M. opened the football season on the local gridiron Saturday afternoon by defeating the team from the V. M. I. Training Ship Franklin 14 to 7. The game was characterized by a beautiful punting feature.

Both sides and poor defense by the Red and White.

Franklin kicked the ball on his thirty yard line and returning it to the line of scrimmage by Tenney. Riddick, Sullivan and Van Broklyn, the Red and White marched down, Tenney was held for a touchdown, Hurtt in the line and the ball over the score.

carried goal. This was all the score. The game was a punting feature.

kicked down in the period being featured by a beautiful punting feature.

and Tenney's goal. A. & M. scored a touchdown.

HILLTOPPERS DEFEATED IN MIGHTY CONTEST

A. & M. Erases Old Scores With Georgetown—Castello Couldn't Shine—Red and White Played Great Game—Everybody Starred.

In one of the best football games ever seen on the local gridiron A. & M. defeated Georgetown University 12 to 0. The Hilltoppers were completely outclassed in every stage of the game, nearly the whole contest being in Georgetown territory.

For ten yards, and he was often thrown for a loss on attempted runs, and finally always downed in his tracks when reversing punts.

A. & M. line held like a stone wall, and out of nine first downs made by Georgetown half of these were made on penalties inflicted on the Techs.

A. & M. have penalized a total of 110 yards and Georgetown 10

The game started with Georgetown kicking off to A. & M.'s 15 yard line by the Hilltoppers. On the next play, Georgetown fumbled and the Techs recovered.

Sullivan and Riddick carried the ball 9 yards and Riddick carried 35 yards. Castello being tackled in the line.

Georgetown lost 10 yards on an attempted end run, and Riddick punts 35 yards out of bounds.

Sullivan and Riddick gain 10 yards. Riddick punts 35 yards.

The Senior Dance

On Friday evening, the fifth of December, the Senior Class gave a dance in Pullen Hall. The dance was attended by the members of the Senior Class and a few members of the Faculty and Alumni as guests. All present had a delightful time, and the evening was most pleasantly passed. The hall was very artistically decorated with banners and pennants, and the punch booth was constructed of red and white and purple and gold crepe paper. An electrical design in the class colors, purple and gold, added much to the beauty of the hall and made a delightful light to dance by. The dance was led by Mr. W. L. Moody and Mr. R. A. Gill.

This was the first dance of its kind at A & M in some years. The class feels that in giving it they revived an excellent custom and served the college a good turn. It not only offers an evening of pleasure, but it brings the class closer together in a social way. One of the greatest troubles at A & M is a lack of class spirit. After four years of life on the same campus there are men in the present Senior Class who scarcely know each other. Anything that promotes a feeling of friendliness and good fellowship between classmates is decidedly a good thing. Class spirit, when properly directed, is a force for the good of the college and its students; and all true class spirit must be founded on friendship. Any social gathering in which a class participates as a whole goes far toward developing this feeling of friendliness.

While the dance was only a start toward developing a social life for all, we feel that it was a good start. It is only one of any number of entertainments that a class might give. It has been suggested that a picnic given some balmy spring day on the banks of some stream would give each man an excellent opportunity to show the lady of his choice what a goodly lot of classmates he has. We think this suggestion a good one. A theater party might also prove a good outlet for Senior dignity.

We hope that succeeding classes will follow up our lead in this respect, at least by continuing the dance custom, and, better still, by giving other entertainments as well. No class can afford to leave anything undone, or any stone unturned that will help to develop friendship and sociability among its members.

Clubs

Bi-Ag Society

The Bi-Ag Society was organized as an honorary Agricultural Society, January 16, 1906, largely through the influence of Dr. and Mrs. F. L. Stevens. It is strictly an A & M product. Up to the time Dr. and Mrs. Stevens left, two years ago, the regular meetings of the Society were held at their home. Now the meetings are held alternately at the homes of the honorary members.

The membership is limited to ten, who are chosen from the Junior and Senior Classes, for their scholarship, high character, and interest in Agriculture.

The object of the Society is to develop high scholarship, morality, sociability, etc., qualities that go to make up a true man. There comes from its atmosphere and refinement a broader knowledge and intensified interest in Agriculture. The desire of the individual in the Bi-Ag is to be of personal aid to every other member, along the lines he most needs assistance. Its members are winning distinctions in various parts of the country as leaders in many lines of both scientific and practical demonstration.

It is the hope and desire of every member that the high standard of the Society will ever be maintained, and to be elected to membership in the Society will always be the highest honor to be obtained by an agricultural student in this college.

SOME INSIDE DOPE ON OUR COLLEGE LIFE

Secrets discovered by the untiring
energy of our Staff Detective and
published for the information of
those who wish to know us as we are

N. B.—The Faculty are earnestly requested not to read this section. Parents likewise

The Bear Case

For many moons past a very mysterious question has puzzled the minds of the worthy gentlemen who daily occupy the seats on the rostrum in Pullen Hall. Often the matter has been ardently discussed at the Tuesday afternoon seances. Many theories have been advanced, and many sciences have been tried and found wanting. And still those brilliant minds, those gigantic intellects, are groping blindly for the answer to that, the most momentous question of the year, "Who put the bear in Chapel?"

We, too, were interested. We at once instructed our modern Sherlock to drop all previous cases, and devote all his efforts to tracing the nefarious offender to his lair. Thinking to learn what clues the Faculty might have, he secreted one of his tiny dictaphones in the scrap basket in Dr. Hill's office to catch the remarks submitted at one of the aforesaid Tuesday afternoon gatherings. The result was the capture of the following very instructive line of conversation, which we take pleasure in printing verbatim:

DR. HILL: Gentlemen, we face a very trying situation. It is the fundamental rule of this college for every one to be a gentleman at all times. The student who put that animal in our place of worship grossly violated that rule. We must discover his identity and request him to leave.

DR. HARRISON: The case is just exactly that, Doctor, just exactly that. He has put the college in a precarious condition. It was an insult to our dignity, a positive insult!

PROF. SATTERFIELD: I think the offender must be some one with a talent for music, for as you know, "Music hath charms to soothe the savage beast." I played to him most sweetly

the other morning on a slide trombone, and the poor brute was so ardently overcome with appreciation that he almost embraced me. That bear has a remarkable ear for music. So my theory is that he was enticed into the hall by the science of harmony. Round up all the musicians in college, cross-examine them carefully, and we will have our man.

PROF. YATES: Needless waste of effort, gentlemen; needless. Let the beautiful science of mathematics solve our problems for us. Let x equal the weight of the bear, x' the weight of his cage, y the time he was last seen in Pullen Park, y' the time he was discovered in Pullen Hall, z the number of bear's tracks on the stairs, and z' the number of human footprints. Write out equations as per the rule found in Nichols, page 77, paragraph 103. Treat the equations simultaneously, gentlemen, simultaneously, and the third derivative of the result will give us the initials of the man we want. Don't you see how simple it is? Beautiful, gentlemen, beautiful!

PROF. ELLIS: No, no, boys; that will cover too much paper. Don't go through all those laborious operations. Work it out on your slide rules. Now, boys, how many of you have your slide rules? You are mere visitors when you don't bring them.

PROF. BROWNE: This trouble has all happened just because you wouldn't let me have my wireless outfit. The static charge from the bear's aura would have reacted with that of his captor, creating an atmospheric disturbance which would have been transmitted to me by the instrument in plenty of time for me to have prevented the outrage.

PROF. WITHERS: Gentlemen, the bear was certainly under the influence of some powerful chemical, probably a poison. The deed could never have been accomplished had he been in a normal condition. A chemical analysis of the bear's stomach will tell us what it was. Find out who has bought, borrowed or stolen some of this drug, and there we have our man. It's just as easy.

Our earnest investigator was discouraged, but not disheartened. He tried out carefully each and every suggestion made by the learned gentlemen whose words we have quoted. But failure dogged his efforts. No musician could he trap into a confession. Although he followed the mathematical formula carefully, he soon became lost in a jumble of figures from which he barely extricated himself with a sound mind. On the slide rule he found himself confronted with the task of extracting the square root of a negative quantity.

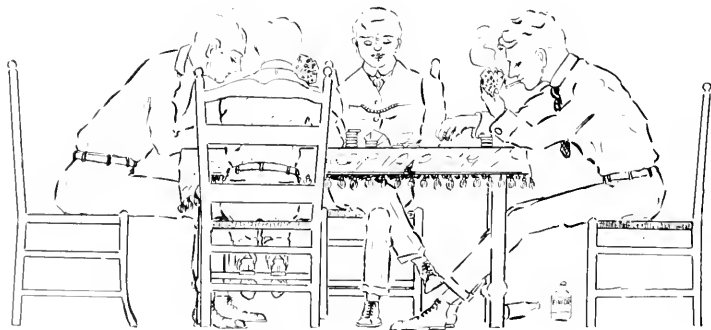

Almost in despair he analyzed the bear's stomach. It contained no chemicals, only acorns. But here at last was something definite to work on. Acorns! Were they fed to Bruin by the wicked hand that enticed him out of his prison-like home in the park, across the campus, up the laborious flight of steps, and into the chapel? Surely they must have been, or else how came they there? Here he applied his modern scientific methods. Microscopic photographs revealed finger print markings on the acorns.

Now it was easy. In those innocent-looking little tracings lay conclusive evidence against the offender. And the culprit, the man who violated the fundamental rule of the college, who put the college in a precarious condition, who was so wrongly accused of being a musician and a poisoner, whose initials were so hopelessly lost in the jungles of Calculus—was Cupid Craig.

Our One and Only Attempt at a Class Banquet

Our man of mysteries strolled casually down Fayetteville Street. Suddenly a loud and hilarious noise attracted his perceptive faculties. It seemed to issue from the interior of the Cafe Gierseh. Such an uproar would seem perfectly natural in the denizens of the Latin Quarter, but it was very foreign to the normally quiet and morpheous streets of Raleigh. His inquisitive faculties were aroused. It was his official duty to investigate such an unusual occurrence. But how was he to place himself in a position to inquire into it?

But, ah! Nothing is impossible to our modern Sherlock. Almost unconsciously he produced from his pocket the pair of ever ready pole climbers. And now the case was easy. From midway of one of the city's ubiquitous telephone poles he peered through a pair of powerful night glasses into a scene of appalling iniquity. A festive board was spread. Oh! Horror of horrors! The banqueters were his own college mates. But may we call it a banquet, a feast of reason? Here reason seemed hopelessly absent. Instinctively he recoiled from the scene of riotous revelry. For what should have been a sedate and tranquil gathering of brotherly spirits was a surging mob of eager and unruly anticipants for the next drink. The nucleus of attraction was not music, poetry, nor art; but a gigantic cask of "Heig and Heig."

AMUSEMENTS OF THE IDLE RICH

The Burning of the Shack

It was at the still, dead hour of midnight. The stirring sound of the college fire whistle suddenly rent the air with its hair-raising blast. From the dormitories the students, half-dazed and half-clad, rushed out and found one of the shacks afire. Their gallant classmate, Ben Foster, was valiantly but vainly fighting the flames with his water bucket. Realizing the inefficiency of this crude method, they quickly put the hose line into action, and the conflagration was soon extinguished.

But why this destruction of college property? Could such an occurrence pass uninvestigated? It was clearly our detective's duty to determine the origin of the fire. Since the shack was unoccupied it seemed obvious to him that the flames had been started by some night-riding incendiary, whose identity it remained for him to discover. To the ordinary lay mind this would seem an unsolvable mystery, but never does any criminal escape without leaving some track behind him that scientific methods will bring to light.

Thinking possibly he might find some eye witness to the deed, our man carefully cross-examined the freshman inhabitants of the shacks. But here he learned nothing hopeful; even the occupants of the adjoining shack had slept peacefully through the whole excitement. He found footprints galore, some left by bare feet, a few by stocking-clad feet, and some by shoes; but a most careful analysis of these tracks only led to confusion.

Failing in this direction, he aimlessly walked around the building, casually flashing his searchlight here and there. Almost hopelessly he continued his wanderings for hours and hours. But as he was about to depart an apparently insignificant object came within the pencil rays of his flashlight. It was only a half burned match mashed into the mud near one corner of the building, but enough to put his trained faculties on the alert at once.

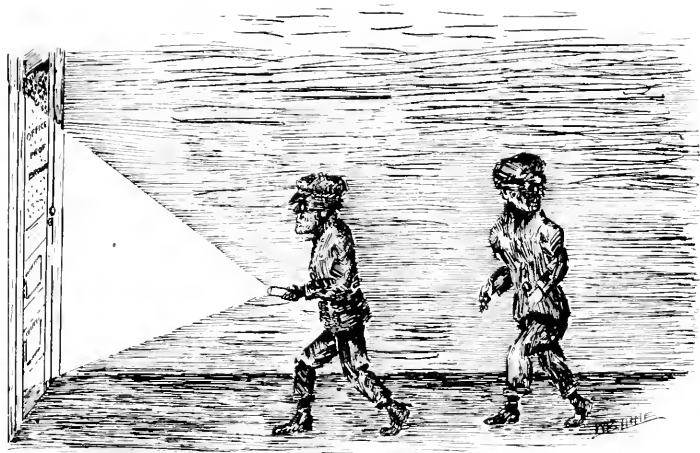

"Ah!" he said, "perhaps it was from this corner that the fire started."

With microscopoe and flashlight he minutely examined the objects around. The match, if it should turn out to be the one that started the conflagration, must have been struck somewhere near by. A jagged nail projected from one of the charred sleepers. This to the ordinary observer would seem trivial, but to our infallible analyst nothing is too small to demand the most careful scrutiny. His powerful microscope revealed a little blackened bead of some substance on the end of the nail. Brushing away the sooty covering he discovered this bead to be a dried clot of blood.

Now the secret began to reveal itself. To his trained mind it was evident that this drop of blood came from the hand of the base villain who started the trouble, for in striking the match his hand must have encountered the projecting nail. Producing his pliers he cut off the nail and carried it in triumph to his laboratory. A microscopic photograph and a chemical analysis revealed the arrangement of the corpuscles and the exact composition of the blood.

He required every man in college, on pain of instant expulsion, to deliver to him at once a sample of his own blood. It was now a mere matter of routine. Examining the samples one by one and comparing them to the original, he proved conclusively that this night-riding incendiary, this wilful destroyer of college property, was none other than our hitherto highly respected and honored classmate, M. R. Quinerly.

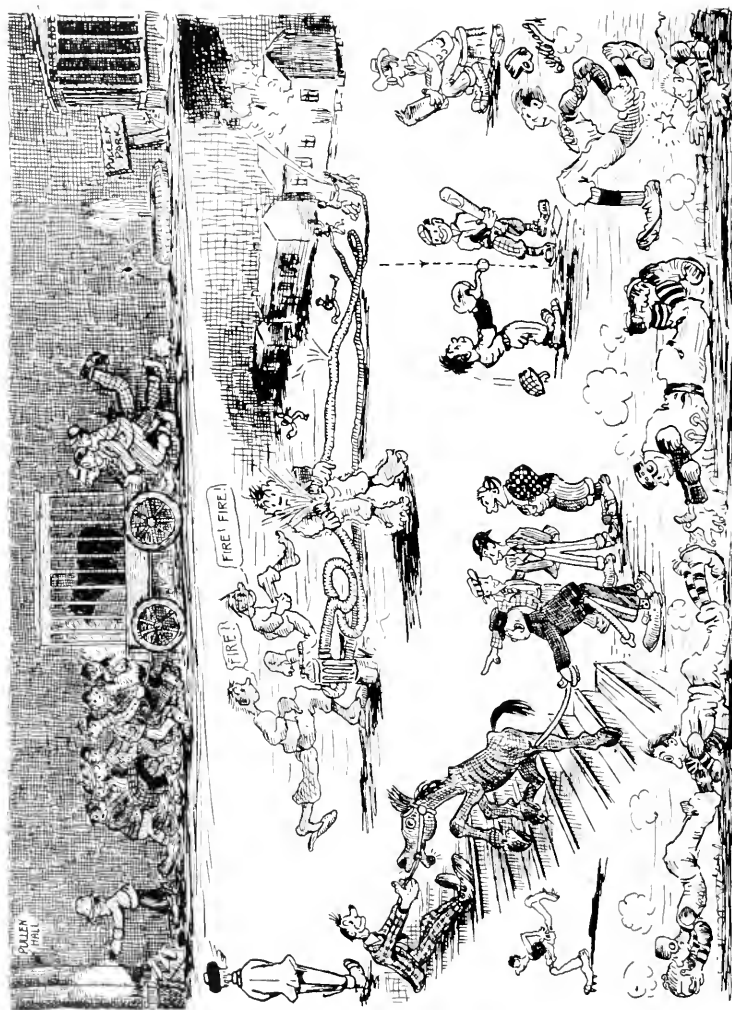

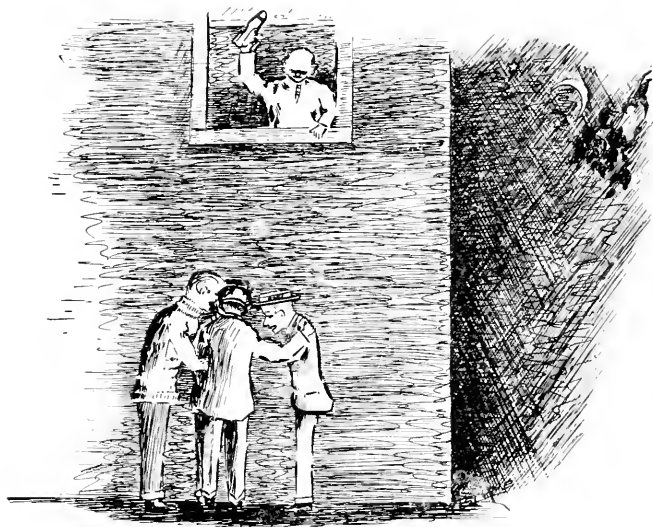

The night was very dark and very cold. The wind whistled drearily through the hallways of the Engineering Building. It was during the fall term exams. Two masked figures crept noiselessly down the hall. They were bent on a nefarious purpose—to procure a copy of the next day's examination from the professor's office. Cautiously they opened the door with the unfailing cuff. With palpitating hearts they crept inside and flashed on a pocket flashlight. On the professor's desk, neatly folded, was a piece of paper. Eagerly they seized it. But alas! This is what they read:

N. B.—To whom it may concern: My examination has not yet been made out.

WM. HAND BROWNE, JR.

The scene was on the beautiful campus of Peace Institute; the time, very late on a balmy moonlight night—a night for lovers, one might say. The charming strains of “The Trail of the Lonesome Pine” had just been rendered by masculine voices, followed by “There’s a Girl in the Heart of Maryland”; and then a dreadful silence.

“Why don’t they applaud, or say something?” said Moody.

“I don’t know. I am pretty sure this is the right dormitory,” said Shaw, “their room is right overhead, I think.”

“Perhaps they didn’t hear us; we will sing a little louder,” spoke up Anthony.

Again the beautiful, enchanting strains of masculine voices rent the air. Again they gazed expectantly at the windows overhead. At last one was raised.

“Oh! They are going to throw us down a cake or something,” said Jewell.

A missile hurtled through the air, and fell alarmingly close to the head of the lad whose voice had rendered the deep bass notes so sweetly.

It was a shoe—size number eight.

Despite his most determined efforts, our modern Sherlock has as yet failed to discover what young lady purchased a number eight shoe at a Raleigh shoe store.

The Height of Improbability

Our man of mysteries was safely enconcealed behind the curtains in Dr. Hill's office. He had seen little groups of the Faculty whispering together and he felt it to be his duty to find out what was going to happen. He did not have long to wait. Seven sportive gentlemen tripped gaily in and sat down around the long table. They seemed in the best of spirits. Our man could not imagine the reason for such hilarity among gentlemen who are usually of such calm and dignified demeanor, but he soon saw.

From a hidden panel under the table, Dr. Hill, who sat at the head of the table and seemed to be master of ceremonies, produced a box of peculiar little celluloid disks. He counted out seven piles of these disks, each pile containing some of each of the three colors, red, white, and blue. He gave each man one of these piles and received a five dollar bill in return from each. Our friend was dumfounded, shocked beyond measure. "Can it be possible," thought he, "that these men whom I have honored and respected for four long years are going to indulge in a wicked game of chance?" It was hard to believe, and yet the game went on right before his eyes.

"Gentlemen," said Dr. Hill, "I am sorry to say that I forgot to bring a deck of cards. I guess we will have to send Allen out for some."

"Very simple," replied Mr. Bowen, "I always come prepared; here are your cards, Doctor."

Accepting the proffered deck, the good doctor dealt the hands and the game began with no further delay. The first pot was won by Dr. Harrison without much argument, and the game went merrily on for several minutes. Our hero's attention, which had begun to lag, was awakened by a loud discussion between Dr. Hill and Mr. Bowen.

"It is your deal, Doctor," said Prof. Riddick, passing him the cards.

"I have no white chips. Finn, give me change for a blue bean."

"Here you are, sir, a red and a white. I charge the other white for making the change."

"No! No!" protested the Doctor loudly, "I refuse to pay it."

"Deal, Doctor, deal!" cried Dr. Fulton, "you are wasting our valuable time by arguing over mere trifles."

He dealt the hands. Dr. Harrison was the first to pick up his cards.

Dr. Harrison: "Gentlemen, I think I have something like a straight here, but I will check it up since I am under the guns."

Mr. Bowen: "The pot is open. Competition invited."

Prof. Nelson: "I think maybe I can 'elp this pair of 'ooks."

Prof. Newman: "Going up! Going up! All of which goes to show that I consider my hand more valuable than yours."

Prof. Riddick: "My hand feels very, very heavy, gentlemen. I think it will stand another raise."

Dr. Hill: "Well, being in the driver's seat, I —"

He never finished the sentence. The sound of a clinking saber coming down the hallway, put a sudden stop to the festivities. The Officer of the Day, hearing the rattling of chips, proceeded at once to investigate. His master key gave him some trouble, but at last he succeeded in opening the door and burst into the room. He found only a scattered deck of cards and a floor littered with poker chips. The culprits had fled like rats for the open air, through Mr. Owen's office.
